Storage solutions from a single source.

A hospital is a complex organisation comprising numerous processes and structures. The many different departments, personnel, patients and material flows are all factors in the day-to-day operation of a hospital. In addition to the

medical services provided, efficient processes and the co-ordination of all logistics flows play a critical role in ensuring quality. ZARGES Medical products help to ensure a smooth supply of materials.

Packaging // page 154–166

Optimum packaging solutions with ZARGES cases and accessories.

Access // page 166–175

Safe working at height with ZARGES ladders, steps and scaffold units.

ZARGES

Storage systems // page 12–65

Integrated modular storage systems, compliant with ISO standard, with modules, cabinets, shelving and the corresponding accessories.

Mobile organisation systems // page 66–109

Mobile trolleys to support a range of job functions within different departments.

Transport systems // page 110–135

Universal products for the safe transport of medical goods.

Supply and disposal // page 136–153

Products for the safe and hygienic supply and disposal of recyclables, laundry and sterile goods.

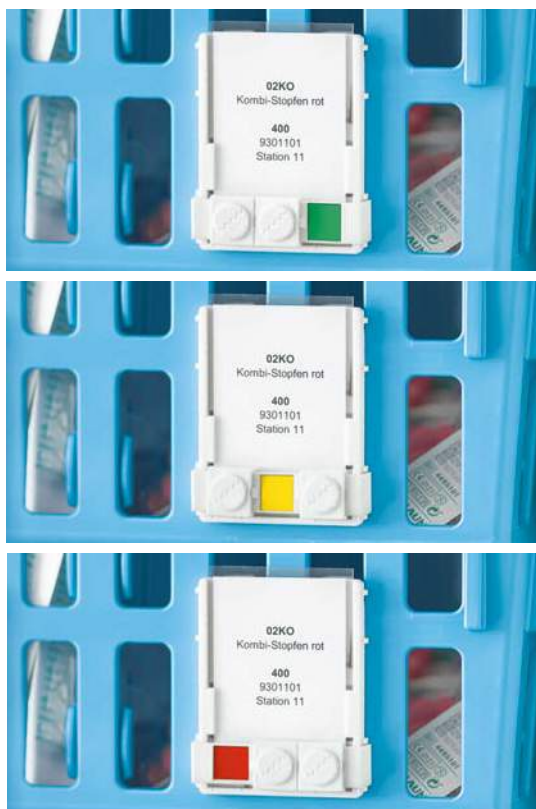

» INNOVATIONS

Innovative, efficient, designed with people in mind: **ZARGES innovations.**

Logistics as ZARGES Medical understands it is very simple: innovative logistics solutions that make your work easier.

At ZARGES, good ideas, innovative products and practical solutions are not a matter of coincidence, but the result of close co-operation with our customers. And this year, based on the many ideas and suggestions received, our engineers have once again developed convincing new products.

This means that we can offer you a broad range of innovations and tried-and-tested solutions in which customers are always sure to find the right product for their requirements. Discover our new products here in the catalogue or make an appointment to discuss your specific needs.

ZARGES medication distribution system

Reliable, patient-specific medication distribution system based on ISO standard. **More from page 104.**

ZARGES labelling system

An optimised ordering process with the “traffic-light system” gives you a better overview, saves time and ensures stock reliability. **Utility-model patent protected. More from page 24.**

ZARGES aluminium shelving system

Modular aluminium shelving system, based on ISO standard. **More from page 54.**

ZARGES MPO IT trolley Type 1

EDP-supported work processes during ward rounds. **More from page 89.**

ZARGES medication cupboard trolley

Sturdy cupboard trolley for transporting medications, based on ISO standard. **More from page 76.**

“For me,
nursing is about taking
care of my patients!”

ZARGES Medical: People are our priority.

For more than 80 years, the brand name ZARGES has been synonymous with premium quality and comprehensive service – since 1998, also with products from our Medical range.

ZARGES Medical stands for: integrated logistics solutions for consumable and durable goods in the healthcare sector. With professional advice, organisation, equipment and service from a single source. And for ZARGES, the focus is always on people. ZARGES products and solutions are designed to enable nursing staff to concentrate fully on their core tasks.

The result: With ZARGES Medical, storage and transport processes in nursing and operational areas dovetail seamlessly. This means lower costs, greater efficiency and motivated personnel.

Quality makes all the difference

We manufacture to the latest standards and improve the workflows within our company by means of consistent process and quality management. **And we do this with just one aim:** to offer our customers and partners products and services which set benchmarks when it comes to reliability and durability.

We offer expert advise. Tailored to your exact requirements

Phase 1 Analysis

Advice on how to improve efficiency

Strategic planning and consistent implementation of the ZARGES Logistics concepts boost efficiency in the healthcare sector, helping to reduce costs. We offer you a comprehensive modular system and the corresponding service for optimum implementation. Our many years of experience in the healthcare sector give us and you the necessary basis for success.

Your advantages with our consultancy service

- ▶ Where all elements dovetail perfectly, costs are cut, profits rise and efficiency is boosted.
- ▶ Everyone benefits – patients, staff and the healthcare facilities.
- ▶ Practical hardware systems are an essential factor in logistics. But well thought-out and optimised processes are just as important.

Our range of services comprises the following:

- ▶ **Storage areas**
Planning and support during conversion to the modular system.
- ▶ **Transport planning**
Optimisation of transport processes and adjustment of the supply frequency.
- ▶ **Nursing and operational areas**
Planning and commissioning of the modular supply systems.

Examination of the existing structures and assessment of your needs

- ▶ **Structure analysis**
A rough analysis is performed in order to ascertain exactly where supply structures can be improved. The existing structures are mapped, examined and displayed. Then the potential for optimisation is located and pinpointed, taking into consideration existing processes in your company.
- ▶ **Needs analysis**
The existing storage and transport methods are defined and examined.
- ▶ **Optimisation approaches**
The objective of the structure analysis is to define the best way to minimise your operating costs and optimise internal processes.

Phase 2 Planning

Planning and optimisation of existing storage and transport capacities

Taking into consideration existing storage and transport methods, we determine and calculate the actual requirements, both with regard to quantities and cost.

► Spatial planning

We calculate the exact storage capacity needed on the basis of consumption analyses, and storage facilities are redesigned to meet the requirements with regard to hygiene and ergonomics. We also optimise the interfaces between operations, logistics and office organisation to ensure seamless transitions.

► Drafting and design

On the basis of logistical standards, we plan facilities which are tailored to the specific requirements of your company in both materials and design.

► Schedule

We help you to co-ordinate and monitor all technical processes and deadlines.

Phase 3 Implementation

Support during integration

► Commissioning

We assist you during implementation and provide in-depth support for employees during the introductory phase and beyond.

► Employee training

All employees involved receive comprehensive training on handling the new supply structures.

Phase 4 Service

We never lose sight of your project. We are still there for you when it's all wrapped up.

► Support

After conclusion of the project, we offer you the possibility of regular monitoring of the attainment of your goals and, if necessary, adjustment and correction of these goals.

Medical

Storage systems

Integrated modular storage systems to ISO standard, with modules, cabinets, shelving and corresponding accessories.

Product overview	14–15
Supply chain	16–17
Modules and modular baskets	18–20

Modular storage options

Storage of medications

Storage systems for sterile goods

Modular cabinet system

"Traffic light" labelling system

The optimised supply chain.

An efficient supply chain is the basis for productive and transparent logistics. ZARGES products support an integrated flow of materials from requisition through to the point of consumption.

Material use

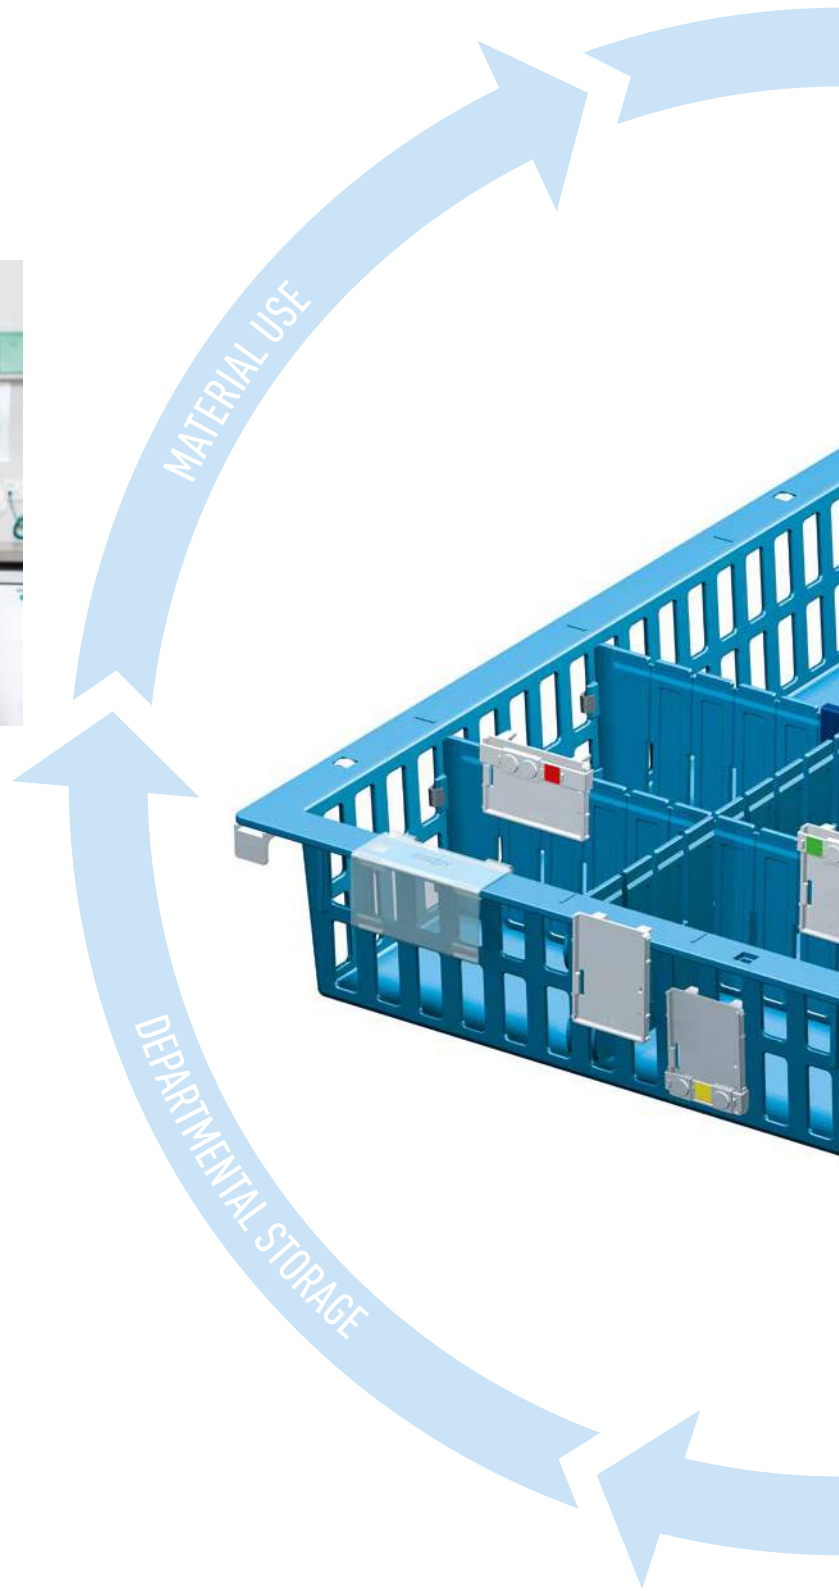

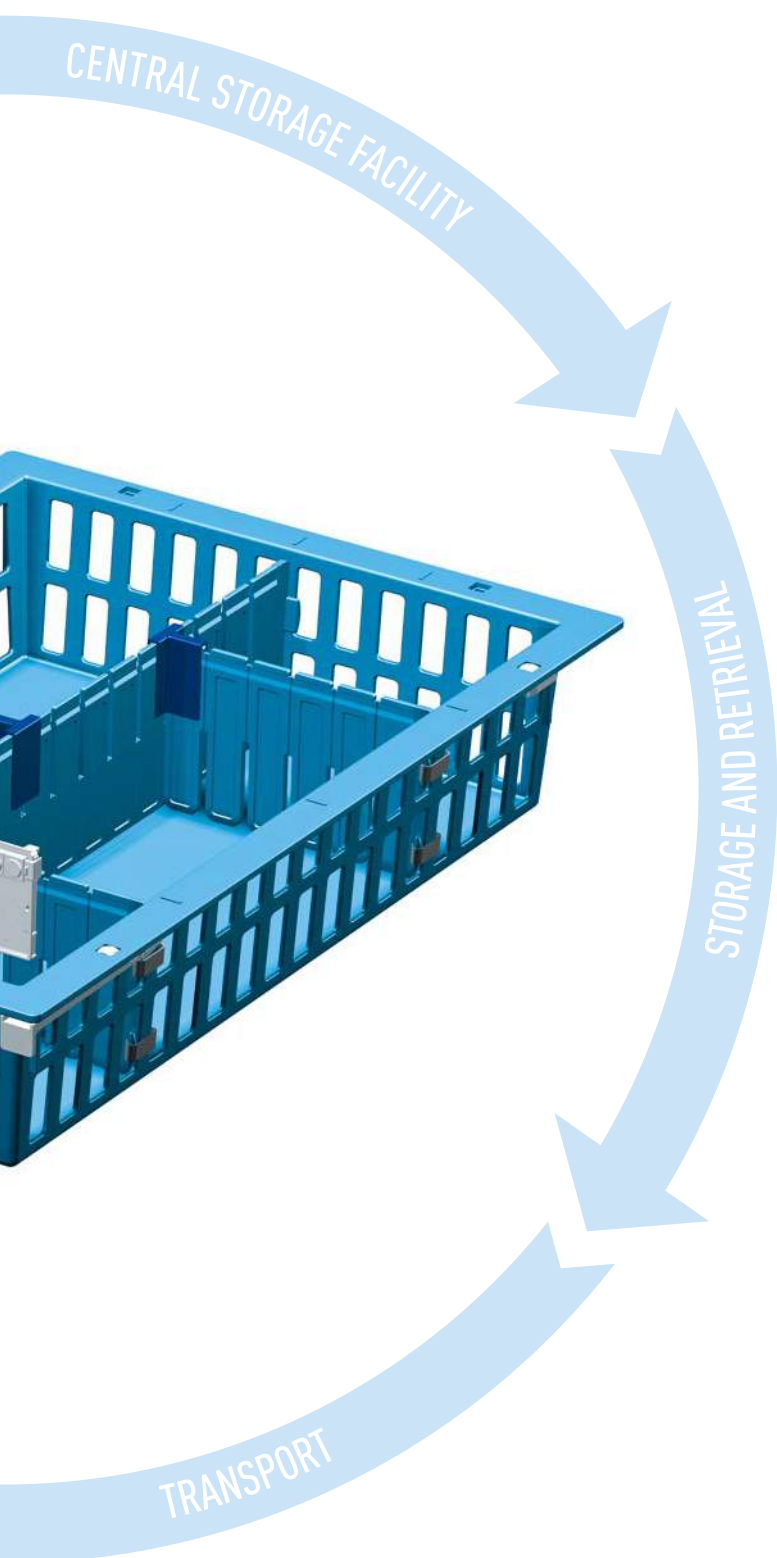

Nursing trolleys, dressing trolleys etc.

Departmental storage

Storage in nursing and operational areas

Central storage facility

Modular goods storage system

Storage and retrieval

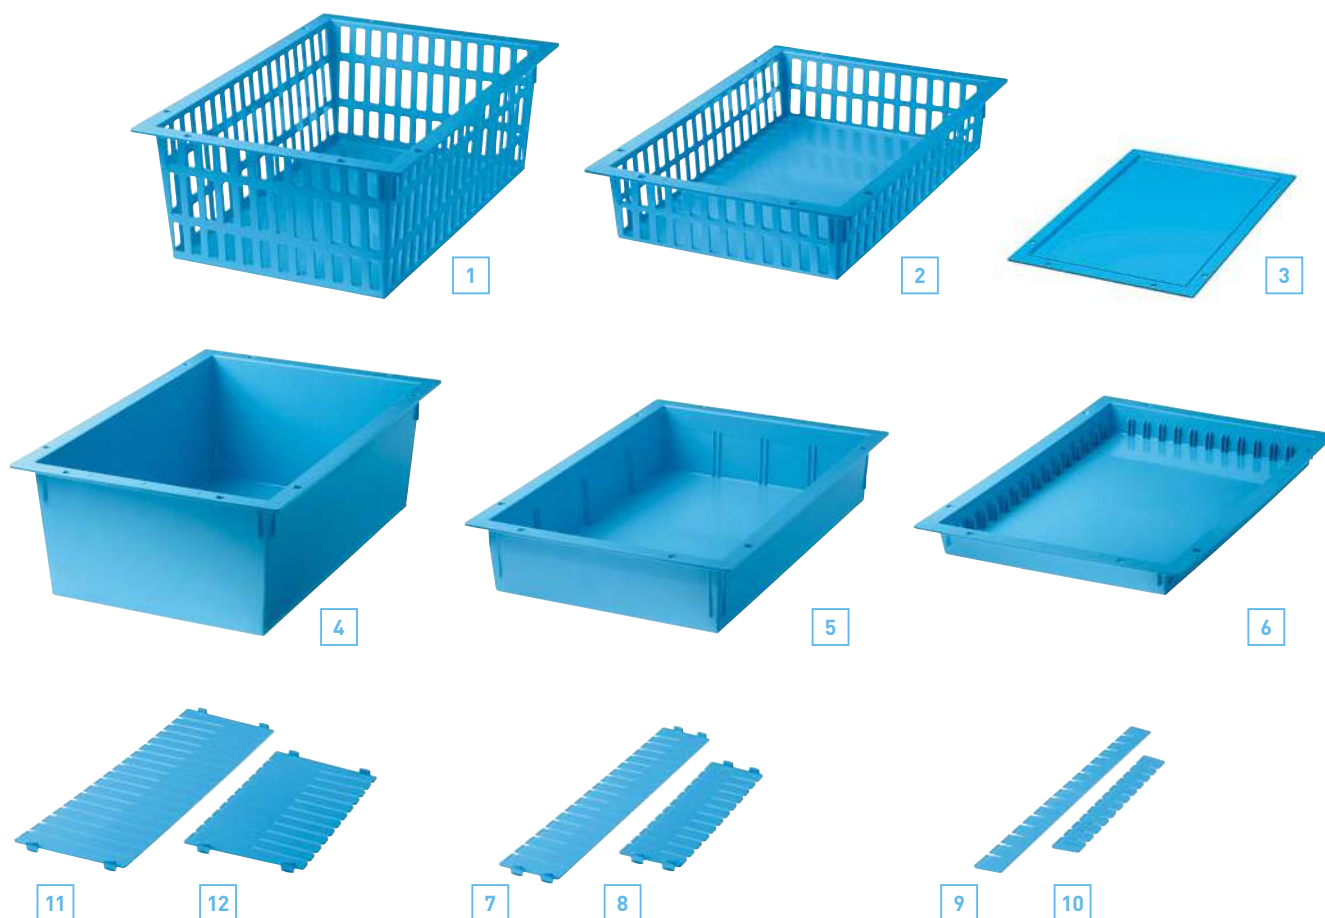

Mobile modular stock picking

Transport

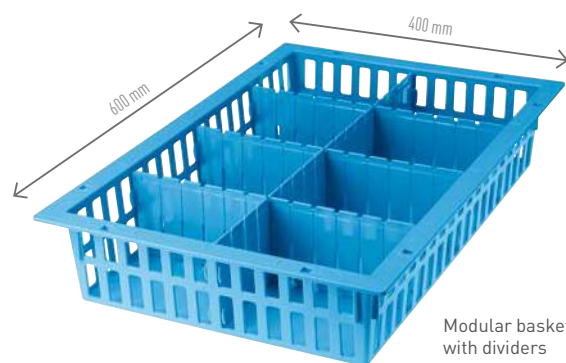

Protected transport of goods

Practical whatever the task in hand: modules and modular baskets.

ABS modules and ABS modular baskets, 600 × 400 mm

- ▶ Made from acrylonitrile butadiene styrene (ABS), light blue.
- ▶ Modules and modular baskets are stackable.
- ▶ Heat-resistant to 85°C.
- ▶ Sealed floor provides reliable protection against spilled liquids, dust and dirt particles.
- ▶ Simple mounting of label holders regardless of the position of the lengthwise and crosswise dividers.
- ▶ Can be subdivided as required, visual aids for positioning of dividers.
- ▶ Designed for use with support walls or telescopic rails. Includes safety stop system.
- ▶ Baskets with a load bearing capacity of up to 20 kg.
- ▶ Medication module with a load bearing capacity of up to 15 kg.

No.	Order No.	Description	Dimensions, L × H, approx. mm
1	46000	ABS modular basket	600 × 400 × 200
2	46005	ABS modular basket	600 × 400 × 100
3	46201	ABS module lid	600 × 400 × 15
4	46200	ABS module (not sub-dividable)	600 × 400 × 200
5	46202	ABS module	600 × 400 × 100
6	46011	ABS medication module	600 × 400 × 50

Matching dividers

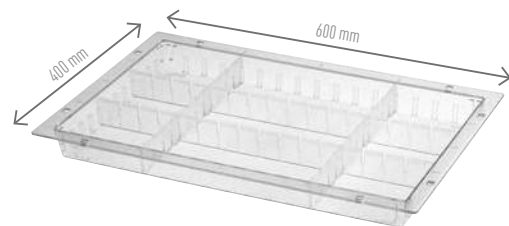

No.	Order No.	Description	Dimensions, L × H, approx. mm
7	46029	Lengthwise divider for 46005/46202/46208	600 × 100
8	46030	Crosswise divider for 46005/46202/46208	400 × 100
9	46034	Lengthwise divider for 46011	600 × 50
10	46035	Crosswise divider for 46011	400 × 50
11	46027	Lengthwise divider for 46000/46209	600 × 200
12	46028	Crosswise divider for 46000/46209	400 × 200

Reliable even at high temperatures: modules and modular baskets in PC.

PC modules, PC modular baskets and PC dividers, 600 × 400 mm

- ▶ Made from polycarbonate (PC), transparent.
- ▶ Modules and modular baskets are stackable.
- ▶ Heat-resistant to 121°C.
- ▶ Sealed floor provides reliable protection against spilled liquids and dust.
- ▶ Simple mounting of label holders regardless of the position of the lengthwise and crosswise dividers.
- ▶ Can be subdivided as required, visual aid for positioning of dividers.
- ▶ Slots for lengthwise and crosswise dividers.
- ▶ Designed for use with support walls or telescopic rails. Includes safety stop system.
- ▶ Baskets with a load bearing capacity of up to 20 kg.
- ▶ Medication module with a load bearing capacity of up to 15 kg.

PC medication module with dividers

No.	Order No.	Description	Dimensions, L × W × H, approx. mm

Intelligent, innovative and efficient: the ZARGES labelling system.

Label clip

A seamless and optimised ordering process is only possible with the help of simple and intelligent labelling.

- ▶ The clip, which can also be retrofitted, is an ideal addition to our existing labelling system. An innovative further development of our existing product range.
- ▶ All label holders can be inserted with and without a clip.

With a simple sliding movement, the “traffic light system” indicates when new stock is required. The filling level of the KANBAN container is displayed and the order status visually recorded. **Utility-model patent protected.**

Green: sufficient quantity of the article in stock.

Yellow: article is ordered/order re-recorded.

Red: re-order article.

Optimum supply guaranteed: labelling.

ZARGES cabinet systems.

With the complete ZARGES storage system, medical consumables and pharmacy goods are stored optimally and in compliance with the most stringent hygiene requirements, but are always to hand when required.

Ideal solutions for an ergonomic work process

1 Support systems. such as support walls, telescopic rails and multifunction insert rails allow easy access. See from page 28. **2 Cabinet accessories.** The well thought-out cabinet system comprises a wide range of accessories, e. g. holders for catheter storage, wire mesh compartments, notched rails for telescopic drawers, recyclables collection bin, shelf compartments. See from page 32. **3 Cabinet units.** The modular ZARGES cabinet system can be put together by combining individual

cabinet units, e.g tall cabinet, lower cabinet, wall cabinet and top cabinet. See from page 38. **4 Material/surface.** ZARGES offers a wide variety of materials and surfaces for individual applications. See from page 43. **5 Modules and modular baskets.** ZARGES ISO modules and modular baskets. See from page 18. **6 Labelling system.** The ZARGES labelling system. See from page 24.

Sturdy, functional, universal: support walls for simple assembly.

Support wall for tall cabinet, straight

- ▶ ABS, white/grey.
- ▶ Includes safety stop system.
- ▶ Injection moulding.
- ▶ One version, identical on left/right.
- ▶ Load bearing capacity of up to 20 kg per insert level.
- ▶ Hygienic border between support wall and cabinet body.
- ▶ Installation with and without holding/angle strip.
- ▶ Minimal assembly and disassembly work required if secured with holding and angle strips.
- ▶ With 7 support levels per panel.

Order No.	Description	Dimensions, D × H, mm
46125	ABS support wall, straight, rail for ISO 618	364 × 325
46126	ABS support wall, straight, rail for ISO 418	564 × 325

Support wall for tall cabinet with tilt function

- ▶ ABS, white/grey.
- ▶ Includes safety stop system.
- ▶ Injection moulding.
- ▶ One version, identical on left/right.
- ▶ Load bearing capacity of up to 20 kg per insert level.
- ▶ Hygienic border between support wall and cabinet body.
- ▶ Installation with and without holding/angle strip.
- ▶ Minimal assembly and disassembly work required if secured with holding and angle strips.
- ▶ With 6 support levels per panel.
- ▶ Tilt function to approx. 25°.

Order No.	Description	Dimensions, D × H, mm
46127	ABS support wall, rail with incline for ISO 618	364 × 325
46128	ABS support wall, rail with incline for ISO 418	564 × 325

Required mounting elements

Quick and easy access: telescopic rails.

Telescopic rails for ISO standard cabinets, can be hooked on in various positions

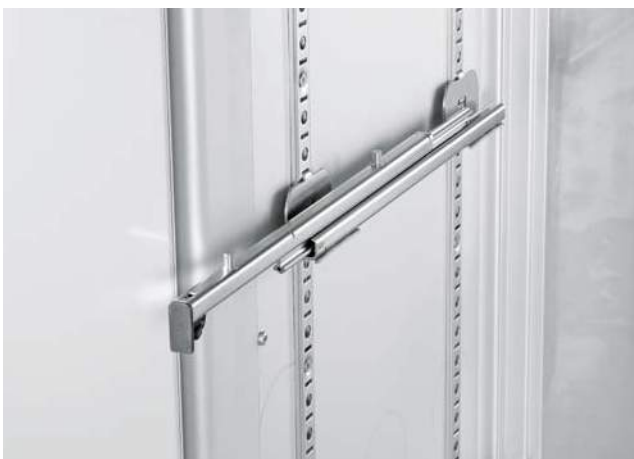

- ▶ Galvanised steel.
- ▶ Fully extendable on precision rails with double bearings.
- ▶ Pins for direct mounting of the modules, modular baskets and shelf compartments.
- ▶ Load bearing capacity of up to 35 kg total weight.
- ▶ Engagement of the rail in end position, locking.
- ▶ 2 hook-on tabs for each telescopic rail for hooking into notched rails.

Telescopic rails, can be hooked on in various positions

Order No.	Description	Dimensions, L, approx. mm
46013	Telescopic rail, right	600
46014	Telescopic rail, left	600
46515	Telescopic rail, right	400
46516	Telescopic rail, left	400

Telescopic rails, can be hooked on in various positions and pulled out on both sides

Order No.	Description	Dimensions, L, approx. mm
46118	Telescopic rail right/left	600

Telescopic rails for ISO standard cabinets for fixed installation

- ▶ Galvanised steel.
- ▶ Fully extendable on precision rail with double bearings.
- ▶ Direct accommodation of the modular baskets and modules with adapters which are additionally required.
- ▶ Load bearing capacity of up to 35 kg total weight.
- ▶ Automatic engagement of the rail in end position, cushioned with soft closing.
- ▶ 2 fastening tabs for each telescopic rail.

Telescopic rails, fixed

Order No.	Description	Dimensions, L, approx. mm
46155	Telescopic rail, right	600
46156	Telescopic rail, left	600
46157	Telescopic rail, right	400
46158	Telescopic rail, left	400

Notched rails for the flexible installation of telescopic rails and multifunction insert rails

- ▶ Galvanised steel.
- ▶ Protected against corrosion.
- ▶ Insertion slots at intervals of 25 mm.
- ▶ Permanently screwed to the cupboard inside wall.

Notched rails for telescopic rail

Order No.	Description	Dimensions, L, approx. mm
46017	8 items for 1 tall cupboard	950
46018	4 items for 1 lower cabinet	645
46228	For MPO	850

Practical and easy to install: accessories.

Adapter for fixed telescopic rails

- ▶ Galvanised steel.
- ▶ Telescopic rails for fixed installation have no fitted pins.
- ▶ Adapters are required to accommodate accessories.

Order No.	Version	Description	Dimensions, L, mm
46159	right	for 46155	600
46160	left	for 46156	600
46161	right	for 46157	400
46162	left	for 46158	400

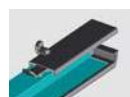

Plastic mount for wire mesh compartment and catheter magazine

Order No.	Material	Dimensions, L, mm
46254	plastic, white	60

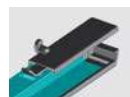

Securing clip for tube holder and catheter drawer

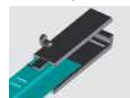

Order No.	Material	Dimensions, L, mm
46129	plastic, white	60

Horizontal position

15° position

30° position

Multifunction insert rails

- ▶ Insert rail: aluminium, U-profile, anodised.
- ▶ End caps: plastic.
- ▶ Longitudinally adjustable by moving the end caps on the insert rail.
- ▶ Can be hooked onto notched rails.
- ▶ Can be suspended in 3 positions: horizontal, 15° and 30°.
- ▶ Load bearing capacity of up to 15 kg.

Order No.	Description	Dimensions, L, approx. mm
46234/46237	2 insert rails	400
46235/46236	2 insert rails	600
355908/355909	2 insert rails	310

Wall holder

- ▶ Anodised aluminium.
- ▶ For wall mounting.
- ▶ Without mounting materials.

No.	Order No.	Description	Dimensions, L × W × H, approx. mm
1	46210	Wall holder to accommodate submodules 46021	256 × 90 × 29
2	46211	Wall holder to accommodate modular baskets	600 × 127 × 41

The clever system for storing catheters.

Catheter racks

- ▶ Stainless steel CNS.
- ▶ Other versions and sizes on request.

Order No.	Description	Dimensions, L × W × H, approx. mm
46046	Catheter racks	150 × 100 × 280
46047	Catheter racks	150 × 100 × 480
46048	Catheter racks	150 × 100 × 600

Frame for catheter racks

- ▶ For upright storage.
- ▶ For 8 catheter racks.
- ▶ Suitable for telescopic rail.
- ▶ Other sizes on request.

Order No.	Description	Dimensions, L × W × H, approx. mm
46503	Frame for catheter racks, anodised aluminium	600 × 400 × 40
46504	Frame for catheter racks, anodised aluminium	400 × 600 × 40

Catheter magazine ISO

- ▶ Stainless steel CNS, electropolished.
- ▶ For upright storage.
- ▶ Suitable for telescopic rail.
- ▶ Incl. 1 lengthwise and 2 crosswise dividers.
- ▶ Installed with plastic mount 46254.

Order No.	Description	Dimensions, L × W × H, approx. mm
46045	Catheter magazine ISO, with flexible subdivision	600 × 400 × 600

Further solutions for catheter storage.

Catheter drawer, steel, powder-coated

- ▶ For suspended storage.
- ▶ Suitable for telescopic rail.
- ▶ Installed with securing clip 46129.

Order No.	Description	Dimensions, L × W, approx. mm
46511	Catheter drawer	600 × 400
46512	Catheter drawer	400 × 600

Tube holder

- ▶ For suspended storage.
- ▶ Suitable for telescopic rail.
- ▶ Installed with securing clip 46129.

Order No.	Description	Dimensions, L, approx. mm
46507	Tube holder, steel, powder-coated	600
46508	Tube holder, steel, powder-coated	400
46509	Tube holder, stainless steel	600
46510	Tube holder, stainless steel	400

ABS catheter holder

- ▶ Material ABS.
- ▶ Suitable for upright storage.
- ▶ Consisting of: 2 × modular basket 46005, 2 × lengthwise and crosswise divider, connecting elements.
- ▶ Suitable for telescopic rail and support wall.

Order No.	Description	Dimensions, L × W × H, approx. mm
345515	Catheter holder, 600 long	600 × 400 × 825
345514	Catheter holder, 600 long	600 × 400 × 600

Organisation made easy: cabinet accessories.

Shelf compartment

- Suitable for support wall and notched rail.

Order No.	Description	Dimensions, L × W × H, approx. mm
46100	Shelf compartment*	600 × 400 × 10
46101	Shelf compartment*	300 × 400 × 10
46214	Shelf support, 4 per shelf compartment	–
46215	Rubber for shelf support, 4 per shelf compartment	–
46212	Shelf compartment, plastic	600 × 400 × 10

* MF-resin-coated wood fibreboard

Order No.	Description	Dimensions, L × W × H, approx. mm
46213	Shelf compartment, plastic with drilled holes for telescopic rails and recessed handles	600 × 400 × 10

Wire mesh compartment

- Chrome nickel steel 1.4301, electropolished.
- Frame wire: 6 mm.
- Grid wire: 3 mm.
- Mesh size: 25 × 25 mm.
- Suitable for sterile containers.
- Installed with plastic mount 46254.

Order No.	Description	Dimensions, L × W × H, approx. mm
46550	CNS wire mesh compartment, insertable lengthwise and crosswise, incl. plastic mounts for telescopic rail, peripheral safety frame	600 × 400 × 19

ISO frame for drawers

- Powder-coated steel.
- For telescopic rail.
- To accommodate ISO-standard modules.
- Installation without plastic mount.

Order No.	Description	Dimensions, L, approx. mm
46188	For telescopic rail 46155/46156	600
46189	For telescopic rail 46157/46158	400

Ideal solutions for everyday tasks: cabinet accessories.

Recyclables collection bin

- ▶ Anodised aluminium.
- ▶ 2 drop handles.

Order No.	Description	Dimensions, L × W × H, approx. mm
46084	Recyclables collection bin, anodised aluminium	300 × 264 × 493

Frame for suspension files

- ▶ Anodised aluminium.
- ▶ For DIN A4 suspension file.
- ▶ Suitable for variable and fixed telescopic rails.

Order No.	Description	Dimensions, D, approx. mm
46505	Frame for suspension files, anodised aluminium	600
46506	Frame for suspension files, anodised aluminium	400

Medication refrigerator and freezer

- ▶ Free-standing, can also be installed in modular cupboards.
- ▶ Various models in accordance with customer requirements.
- ▶ Complies with the relevant regulations.
- ▶ Price on request.

Safe for anaesthetics (BTM)

- ▶ All BTMs meet the requirements of the safety levels prescribed by law (delivery includes mounting material and keys). On request, BTMs can be installed in modular cupboards.
- ▶ Special sizes available, e.g. with integrated modular system.
- ▶ Price on request.

Optimally planned: ZARGES cabinet systems.

For operational and nursing areas: planning, coordination, processing and execution

► Spatial planning

We calculate the exact storage capacity needed on the basis of consumption analyses and design the storage facilities to meet the requirements with regard to hygiene and ergonomics.

► Costing

Taking into account the existing storage capacities and all logistics processes, we determine and calculate the actual storage media requirements, both with regard to quantities and cost, and submit them for approval.

► Drafting and design

All materials and the design are individually coordinated and tailored to the requirements of your facility on the basis of the specific logistics processes there.

Where there are special requirements (fire protection, radiation protection etc.), we will find corresponding solutions while still ensuring optimised logistics planning.

► Schedule

We supervise the conversion measures and on request, coordinate the technical processes.

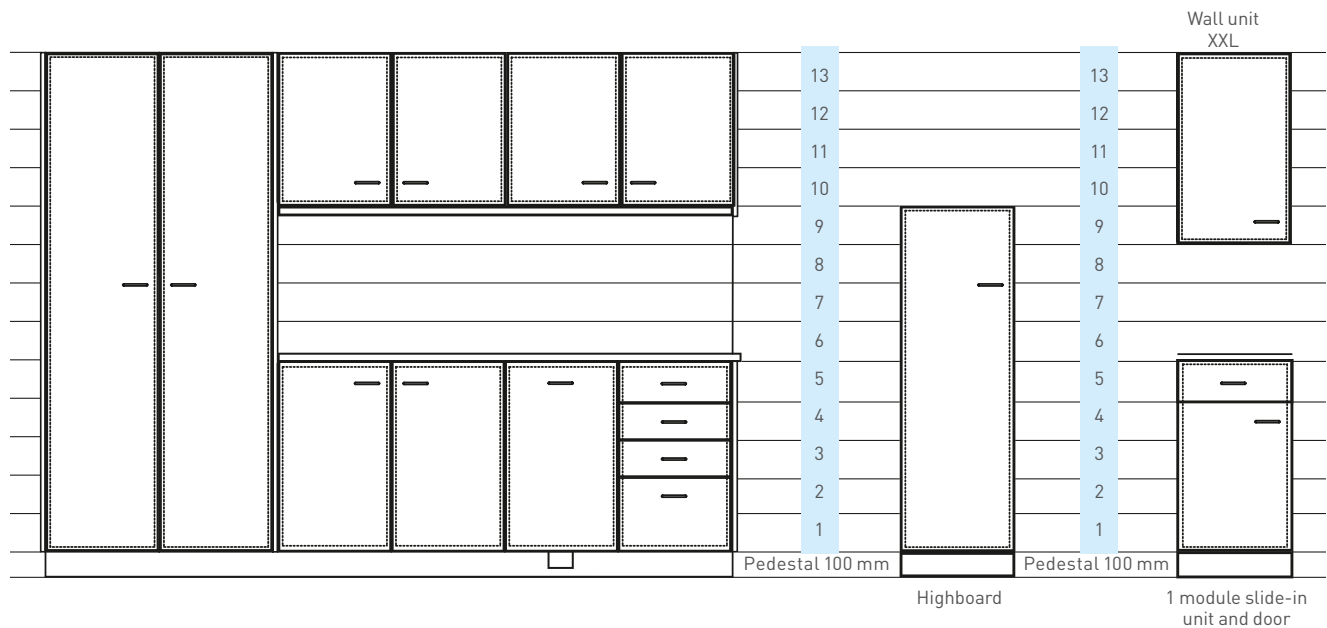

► Full equipment

If desired, we can not only supply the logistics equipment, but also design the entire working area in accordance with ergonomic principles.

► Service

Thanks to our international network of specialist dealers and partners, we are in a position to carry out all structural measures flexibly and in a timely manner. All standard furniture can be delivered at short notice. In the case of projects, delivery is completed to agreed deadlines.

ZARGES height units.

→ **Height units**
Examples of cabinets.

The ZARGES ISO modular cabinet are subdivided into height units (HE). 1 HE = 154 mm.

These height units refer to the height of the cabinet body itself, while in the case of articles which stand on the floor, 100 mm must be added for the pedestal.

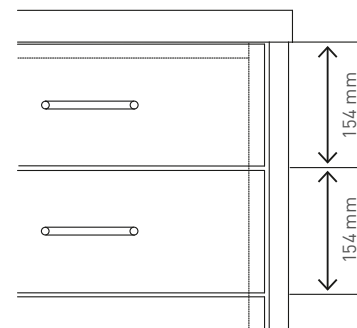

Advantages

- ▶ Individual cabinet configurations using the “ZARGES grid”.
- ▶ Reliable planning of the cabinet body heights.

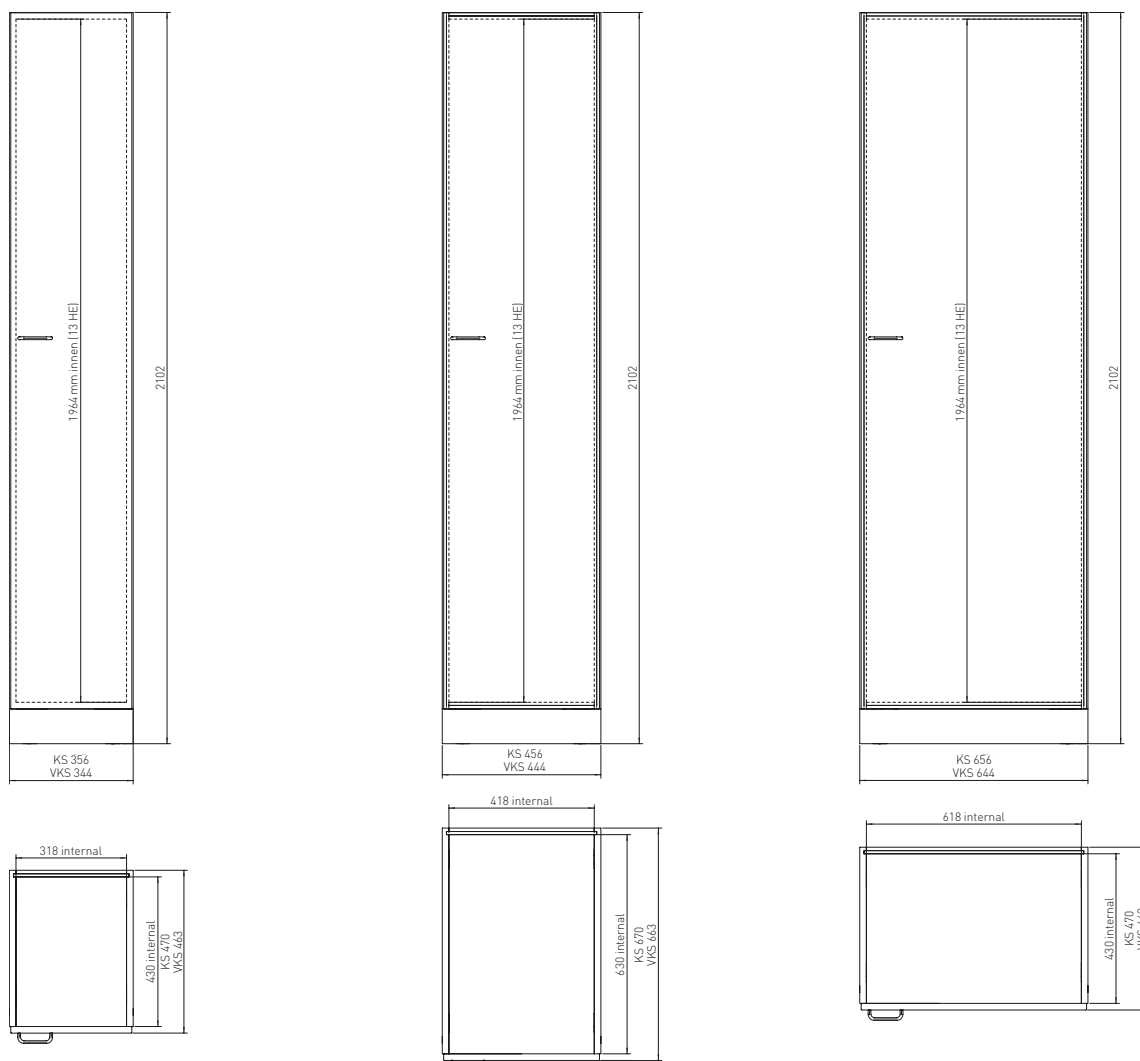

The ZARGES height units enable you to put together individual configurations of standard cabinets to comply with the specific requirements of the user.

Examples

- 1 HE = max. 100 mm modular basket height
- 2 HE = max. 200 mm modular basket height
- 3 HE = safes for anaesthetics (BTMs)
- 4 HE = fitted medication freezer
- 5 HE = fitted medication refrigerator
- 9 HE = catheter racks for upright storage of catheters
- 11 HE = catheter drawer for suspended catheter storage

Tall cabinet.

Cupboard units 1: ISO tall cabinets

Available in wood (KS) and with plastic body (VKS) in ISO systems ISO 318, ISO 418 and ISO 618.

Designed to be equipped with ISO modules

- ▶ support walls.
- ▶ telescopic rails, fixed installation or on notched rails.

Available in versions

- ▶ open.
- ▶ door in KS or VKS.
- ▶ glass-framed door (ESG glass).
- ▶ aluminium and plastic rolling tambour doors.
- ▶ various locking systems possible.

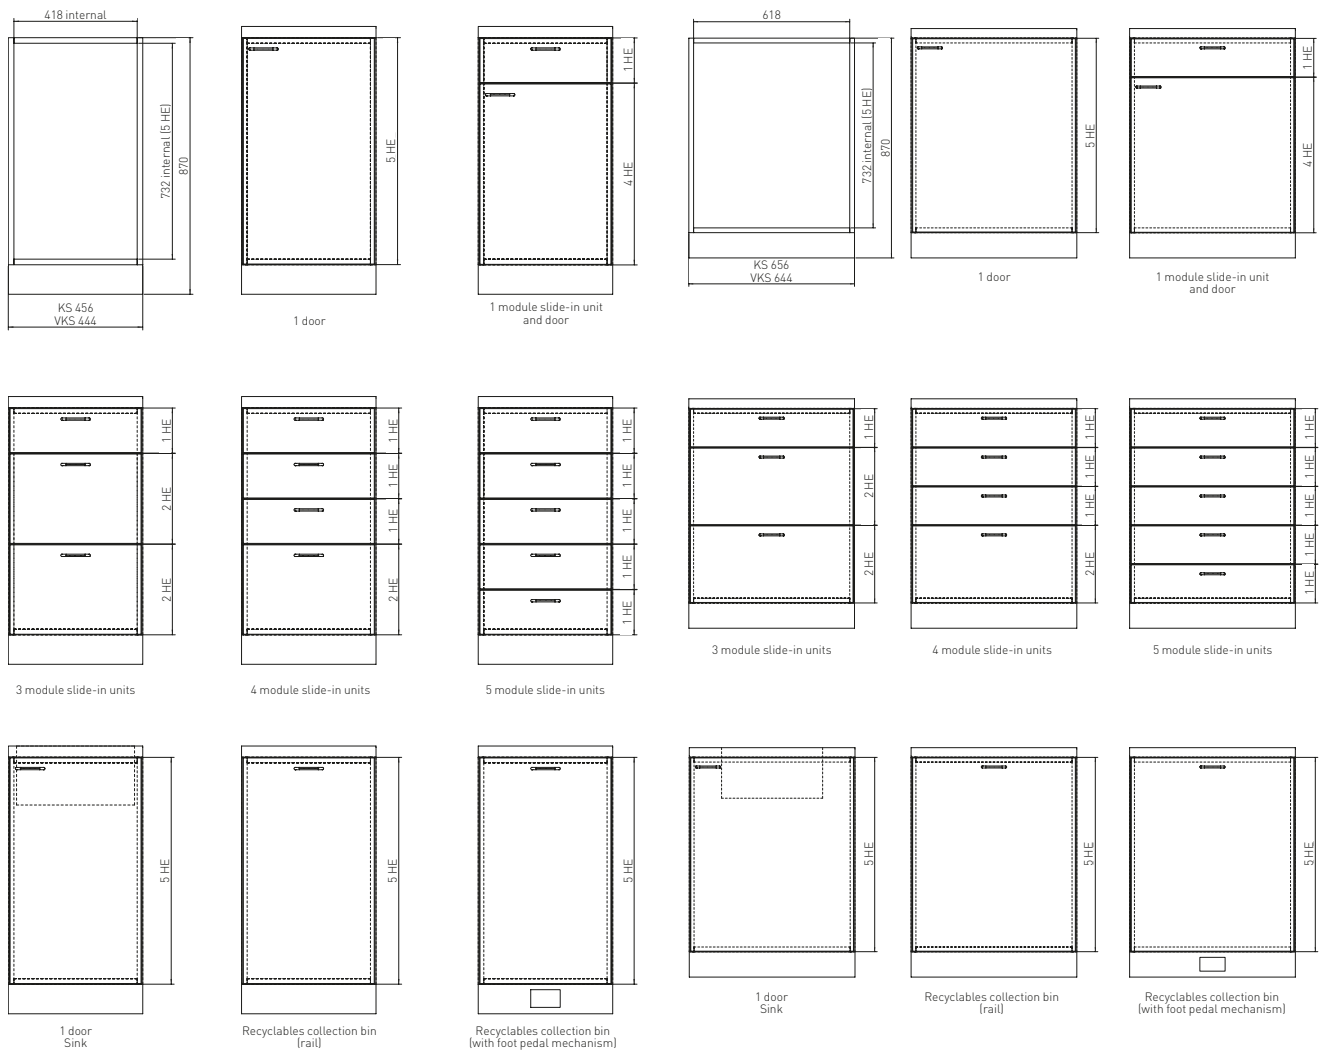

We design and produce tall cabinets with refrigerator systems or with integrated safes for anaesthetics as well as in combination with our ISO modular system.

Abbreviations:

KS: plastic-coated

VKS: plastic

Base cabinets.

Cupboard units 2: ISO lower cabinets

Available with wood (KS) and plastic body (VKS) in ISO systems ISO 418 and ISO 618.

Designed to be equipped with ISO modules

- ▶ support walls.
- ▶ telescopic rails (fixed).
- ▶ module frame on telescopic rails (slide-in unit).
- ▶ notched rails.

Available with various fronts

- ▶ open.
- ▶ door in KS.
- ▶ door in VKS.
- ▶ aluminium glass-framed door (ESG glass).
- ▶ aluminium and plastic rolling tambour doors.

Lower cabinets, e.g. as refrigerator surrounds, are planned and manufactured individually by us to your specifications after selection of the electrical appliances.

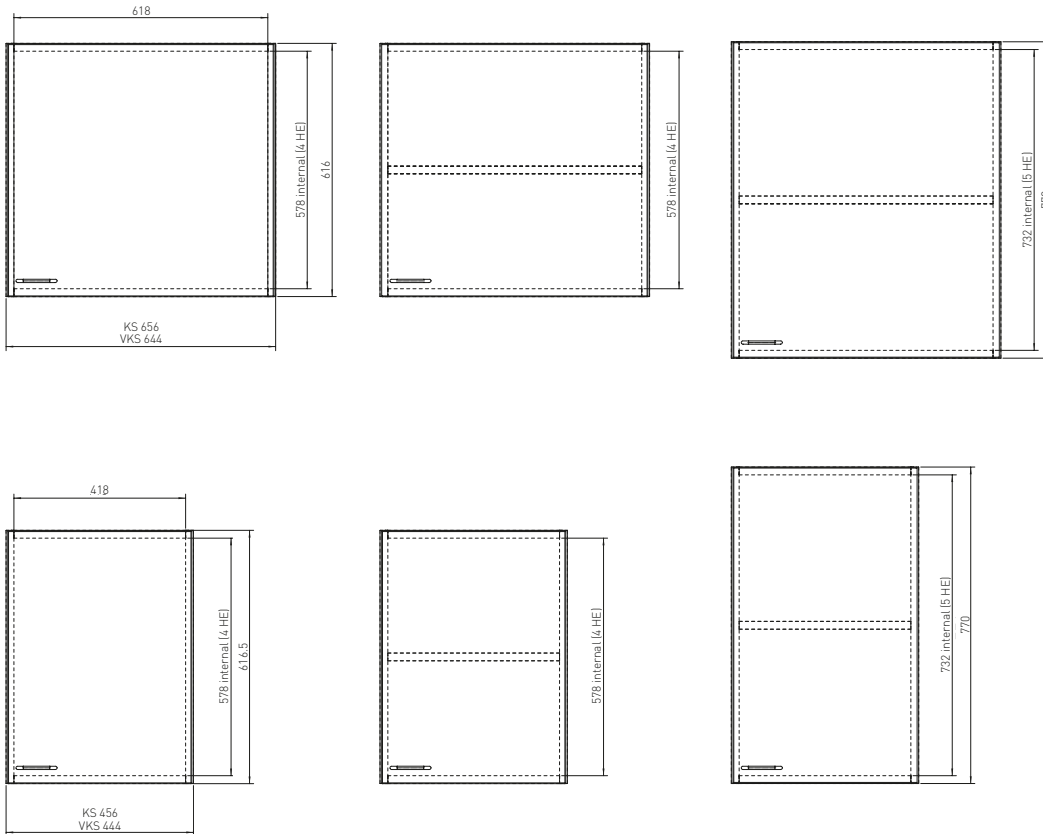

Lower cabinets are also available as:

- ▶ sink base units.
- ▶ lower cabinet recyclables collection system (with foot pedal mechanism).

All lower cabinets in ISO-618 width are also available with two doors.

All cupboards can be supplied with a variety of locking systems.

Wall units.

Cabinet units 3: ISO wall units

Available with wood (KS) and plastic body (VKS) in ISO systems ISO 418 and ISO 618.

Designed to be equipped with ISO modules

- ▶ support walls.

Available with various fronts:

- ▶ open.
- ▶ door in KS.
- ▶ door in VKS.
- ▶ aluminium glass-framed door (ESG glass).
- ▶ aluminium and plastic rolling tambour doors.

We can also supply wall units with shelf compartments on stainless steel shelf support rails. All wall units in ISO 618 with shelf compartments.

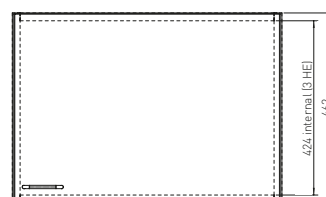

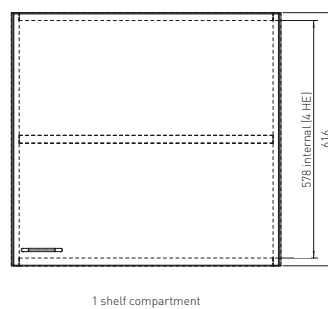

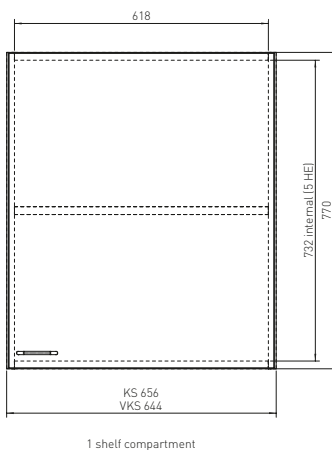

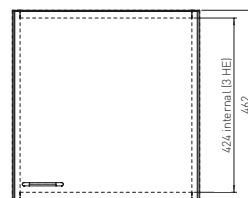

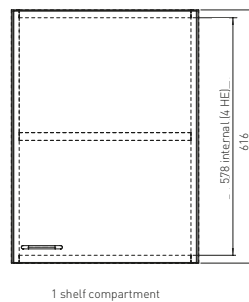

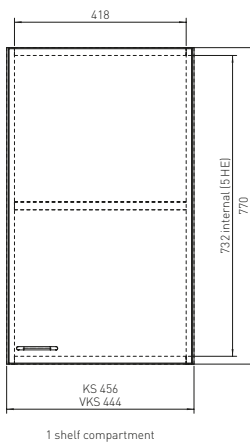

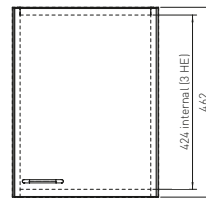

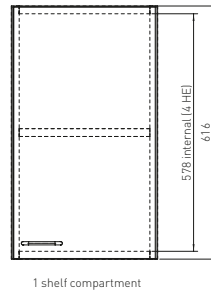

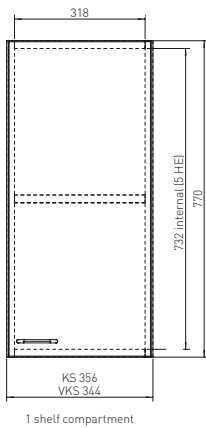

We can also plan top mounted cabinets as cabinets with shelf compartments individually for you to suit the specified room height.

As an option, we can also plan, supply and install our own aluminium rail system ladder.

Top mounted cabinets.

You can find accessories for rail system ladders and hook-on ladders on page 170.

Cabinet units 4: ISO top mounted cabinets

Available in wood (KS) and plastic (VKS) in ISO systems ISO 318, ISO 418 or ISO 618 or after adjustment to the room height.

Designed to be equipped with ISO modules

- ▶ support walls.
- ▶ shelf compartment on shelf supports.

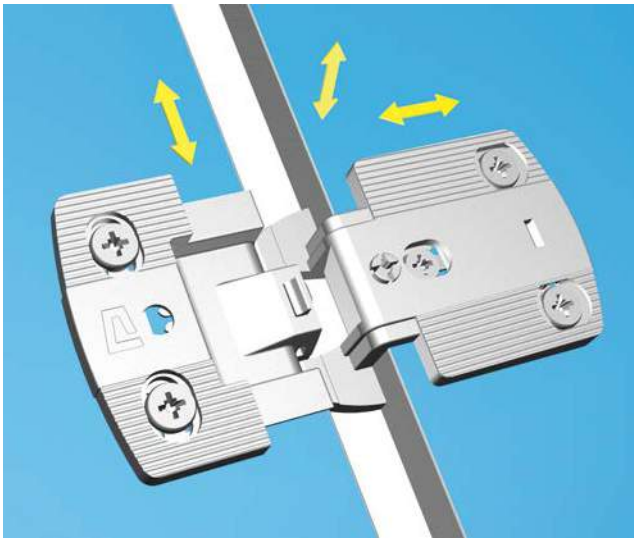

Available in versions

- ▶ open.
- ▶ door in KS or VKS.
- ▶ glass-framed door.
- ▶ can be supplied with a variety of locking systems.

Top mounted cabinets in ISO 618 are also available with two doors.

Railing front (1 HE) recommended.

ZARGES handles, fittings and locking systems.

Hinges

Special flat hinges

- ▶ For wooden doors (material thickness 19 mm).
- ▶ For plastic doors (material thickness 12 mm).

Flat construction – suitable for modular systems

- ▶ Robust all-metal design in precision die-cast zinc.
- ▶ With automatic shutting.
- ▶ Hardened, secured steel axis in maintenance-free plastic bearings.
- ▶ Roll thickness 5 mm, roll length 47 mm.
- ▶ Corner and centre joint 6 mm.
- ▶ Opening angle up to 240°.
- ▶ No space between door and cupboard at 140° opening angle.
- ▶ Can be adjusted in three directions.
- ▶ Door-support adjustment in side section +2/-1 mm.
- ▶ Door height adjustment in head section +2/-2 mm.
- ▶ Via excentric in each case.
- ▶ Depth adjustment via side section +2/-1 mm.

Locking system SYMO 3000 (standard locking)

SYMO 3000 is a unique furniture locking system manufactured by Häfele. No tools required, quick and easy to fit, maximum flexibility with minimum effort.

- ▶ Lock plans can be changed with little time or capital required. All you need to do is replace the cylinder core (no tools required). The lock and the furniture itself remain untouched.
- ▶ As reliable locking is of the essence, we use the SYMO 3000 STW cylinder with tumbler pins in our entire range. Its design allows up to 20,000 different locking combinations.
- ▶ SYMO 3000 allows the realisation of both simple and highly complex locking systems. The lock plan is realised simply by inserting the cylinder core, which can be done at any time, independent of manufacture, delivery or assembly of the furniture. The lock plan can be extended and modified at any time: This is done simply by replacing the SYMO 3000 cylinder cores - a simple and inexpensive solution.

Handles

U-shaped handle

- ▶ Length 106 mm, Ø10 mm.
- ▶ Steel, matt nickel-plated.

Labelling clip

- ▶ For 10-mm round-rod handles.
- ▶ Size 55×9 mm.
- ▶ Material/surface: plastic, transparent.

Further stirrup-type handles, bar stirrup-type handles, inset handles and accessories on request.

ZARGES colour range KS and VKS.

Plastic-coated (KS)

Body

- ▶ Plastic-coated chipboard E1.
- ▶ Sides and floors 19 mm, rear wall 8 mm thick, coated on both sides with MF resin in accordance with DIN 68765.

Fronts, panels and visible surfaces

- ▶ Plastic-coated chipboard E1, 19 mm thick, coated on both sides with MF resin in accordance with DIN 68765.

Edges

- ▶ Corners and edges rounded with a radius of 2 mm.
- ▶ Alternatively, ABS sealing edge (double-band).

Pedestal

- ▶ Raw particle board V100 (waterproof), 19 mm thick, covered with HPL, design as body material or CNS (stainless steel).
- ▶ Lower edge with sealing profile, on request additional sealing between lower edge and floor.

Worktops

- ▶ Postforming boards, HPL-coated, 38 mm thick.
- ▶ Decor according to colour card.
- ▶ On request, solid surface worktops (e.g. Corian) or CNS (stainless steel).

Plastic (VKS)

Body

- ▶ Plastic board with black core.
- ▶ Sides and floors 13 mm thick, rear wall 6 mm with black core.

Fronts, panels and visible surfaces

- ▶ 13-mm plastic board with black core.
- ▶ Plain standard decor: white, light grey.
- ▶ On request with front sealing band.

Edges

- ▶ Milled and polished, rounded with a radius of 2 mm.

Pedestal

- ▶ 13-mm plastic board, decor as for body.
- ▶ Fitted by clipping on.
- ▶ Lower edge with sealing profile, on request with additional sealing between lower edge and floor.

Worktops

- ▶ 38-mm postforming board, HPL-coated.
- ▶ Decor according to colour card.
- ▶ On request, solid surface worktops (e.g. Corian) or CNS (stainless steel).

For shelf compartments, the cupboards are fitted with continuous metal shelf support rails, 5 × 15 mm.

Mobile storage with MPO storage trolleys.

Logistics in the healthcare sector requires flexible and adaptable solutions for storage and internal processes.

MPO storage trolleys in detail.

A modular system comprising just a few basic components allows a wide variety of options which you can configure to your specific needs and requirements as regards design and functionality.

Storage made to measure

For consumables
or pharmacy goods

Storage in operational areas

Catheter or surgery case trolley

Mobile storage cabinets

For ward supplies

Mobile workstations

Storage space directly where you work

Further details, variants and sizes
from page 90.

Mobile storage and supply

Mobile storage on the ward

Flexible intermediate storage of medical products

Storage of medications

Mobile workstations

Variable organisation of space

A sturdy exterior and a highly flexible interior: the ZARGES shelving system.

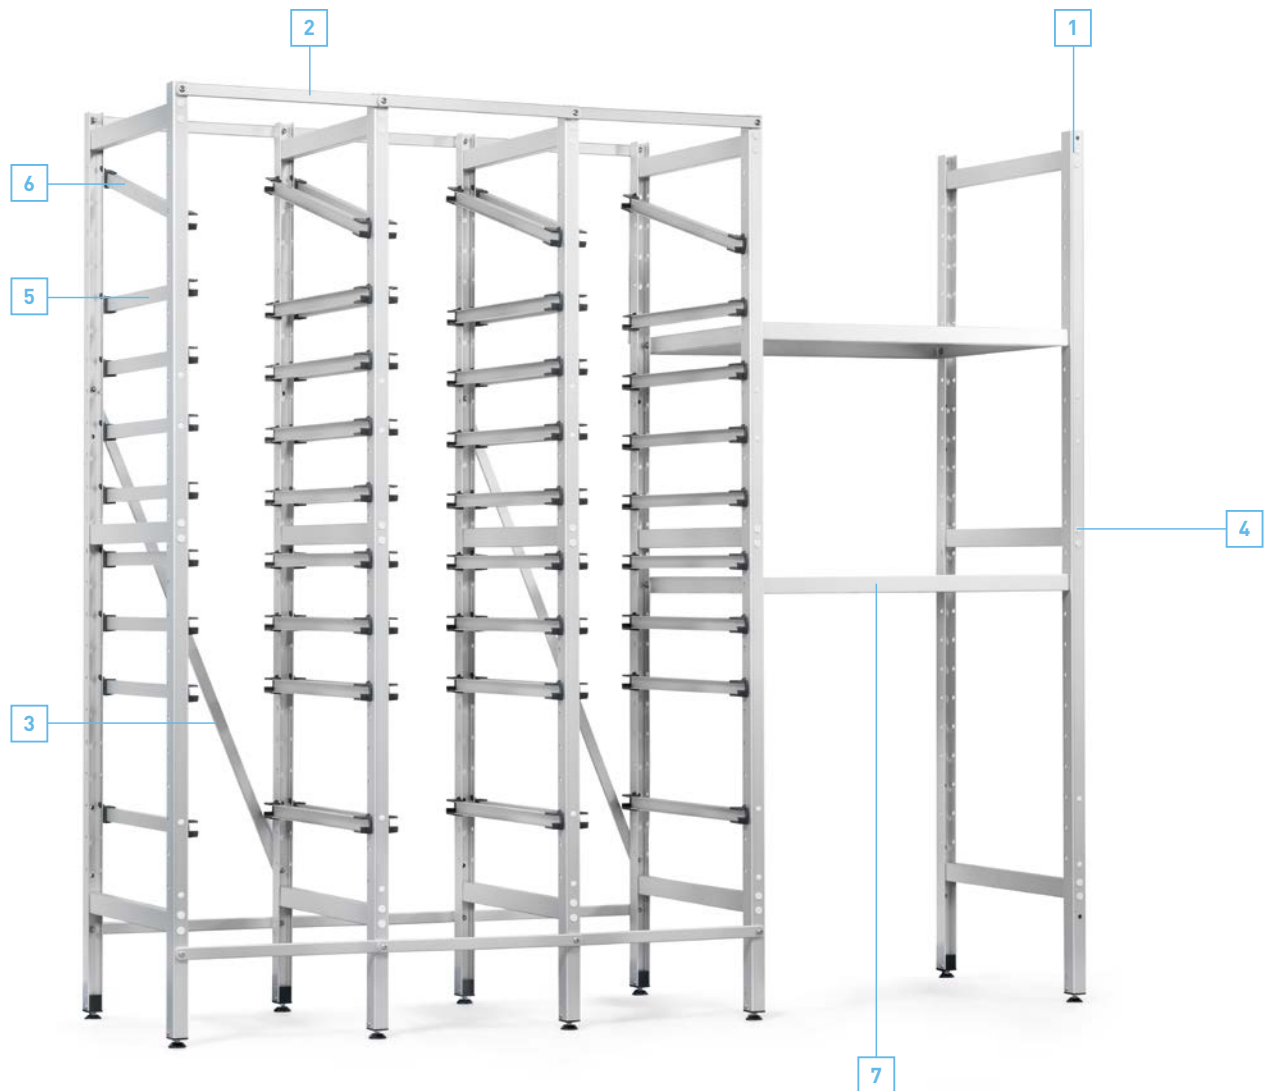

The ZARGES shelving system comes into its own where orderly and safe storage of materials is of the essence. The flexible, modular system can be adapted to suit your specific

requirements, with components that can be combined with other ZARGES systems, helping to improve efficiency in supply chain.

Storage and retrieval shelving.

ZARGES storage and retrieval shelving is suitable for universal applications and can be put together and configured individually by selecting from our range of modules and modular baskets. The open design makes the shelving easy to clean.

1 Shelving segments. Pre-assembled. **2 Connecting rod.** **3 Diagonal braces.** Designed for fitting in alternate rows. **4 Stainless steel connecting elements.** Designed for fitting one set per row. **5 Straight insert rails.** Can be hooked on in various positions. **6 Insert rails with incline.** Can be hooked on in various positions. **7 Shelf compartment.** Made from anodised aluminium.

The universal shelving system.

Aluminium shelving

- ▶ Anodised aluminium.
- ▶ Frame made from U-section, bolted, dimensions 34×34×2 mm.
- ▶ Hole spacing: 71 mm.
- ▶ Total height: approx. 2,000 mm.
- ▶ Lower edge with height-adjustable feet.
- ▶ Hook-on insert rails made of anodised aluminium with sturdy, abrasion-proof end caps in fibreglass-reinforced plastic PA6.
- ▶ Colour: anthracite.

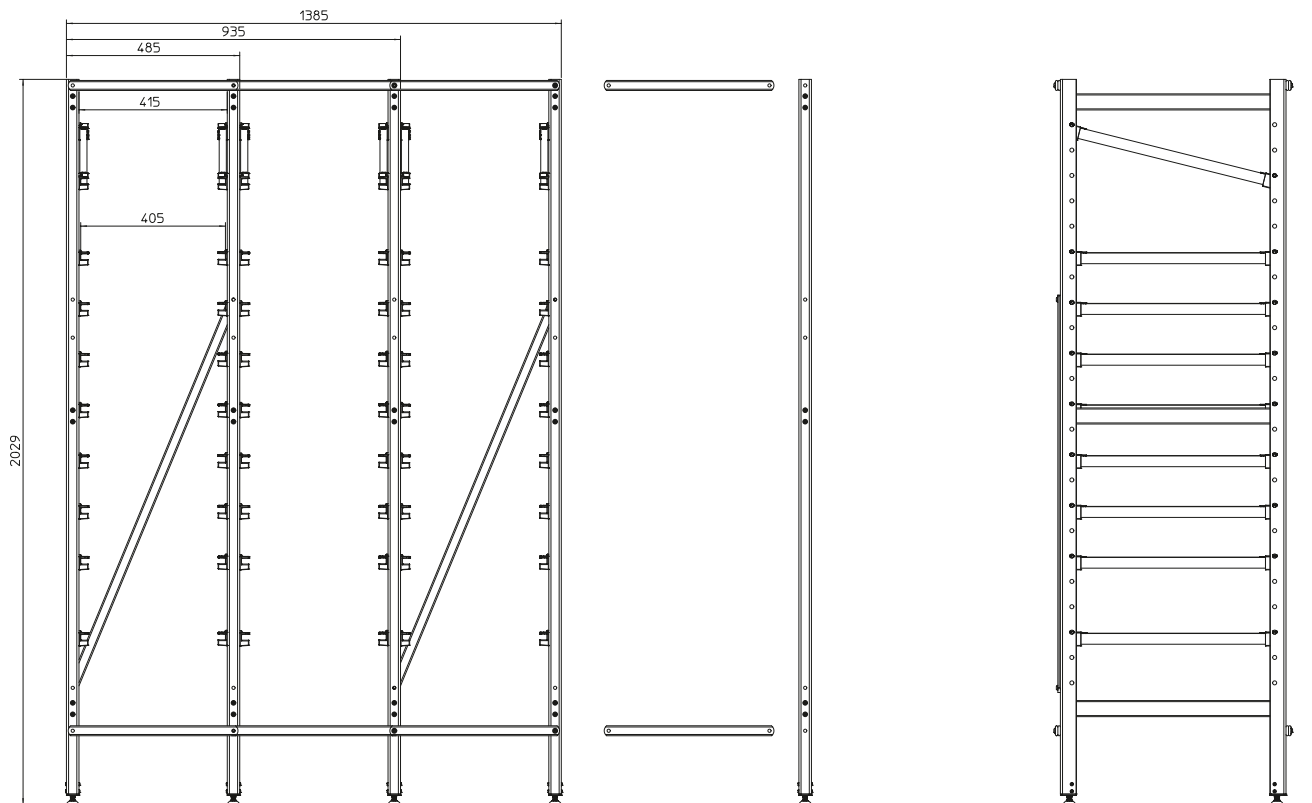

Powder-coated steel

- ▶ Powder-coated steel.
- ▶ Light grey, RAL 7035.
- ▶ Substructure made from robust square tubing 30×30 mm.
- ▶ Frame made from U-section, welded, dimensions 34×34×2 mm.
- ▶ Hole spacing: 71 mm.
- ▶ Total height: approx. 2,000 mm.
- ▶ Lower edge with height-adjustable feet.
- ▶ Hook-on insert rails made of anodised aluminium with sturdy, abrasion-proof end caps in fibreglass-reinforced plastic PA6.
- ▶ Colour: anthracite.
- ▶ Special version in stainless steel.

Use

- ▶ Universal shelving system for storage and retrieval areas.
- ▶ Simple height adjustment with removable insert rails.
- ▶ Insert depth for horizontal or inclined arrangement of the ISO modular baskets.
- ▶ Can be easily extended or combined with steel shelf compartments.
- ▶ Hygienic, easy to clean.
- ▶ For use with ISO modules and modular baskets 600×400 mm made from plastic.

Configuration options for standard shelving for ISO standard modules.

ZARGES storage and retrieval trolleys.

Wherever you need to store or transport laundry, medication, consumable and durable goods safely and hygienically: the storage and retrieval trolley is the perfect solution. This

multifunctional trolley is used in clinics, laundries, industry, the catering trade and public authorities.

Storage and retrieval trolley with hook-on insert rails.

Open construction

Frame is made from U-section, no cavity, easy to clean

Loading

Accommodates modules and modular baskets in various heights

Chassis

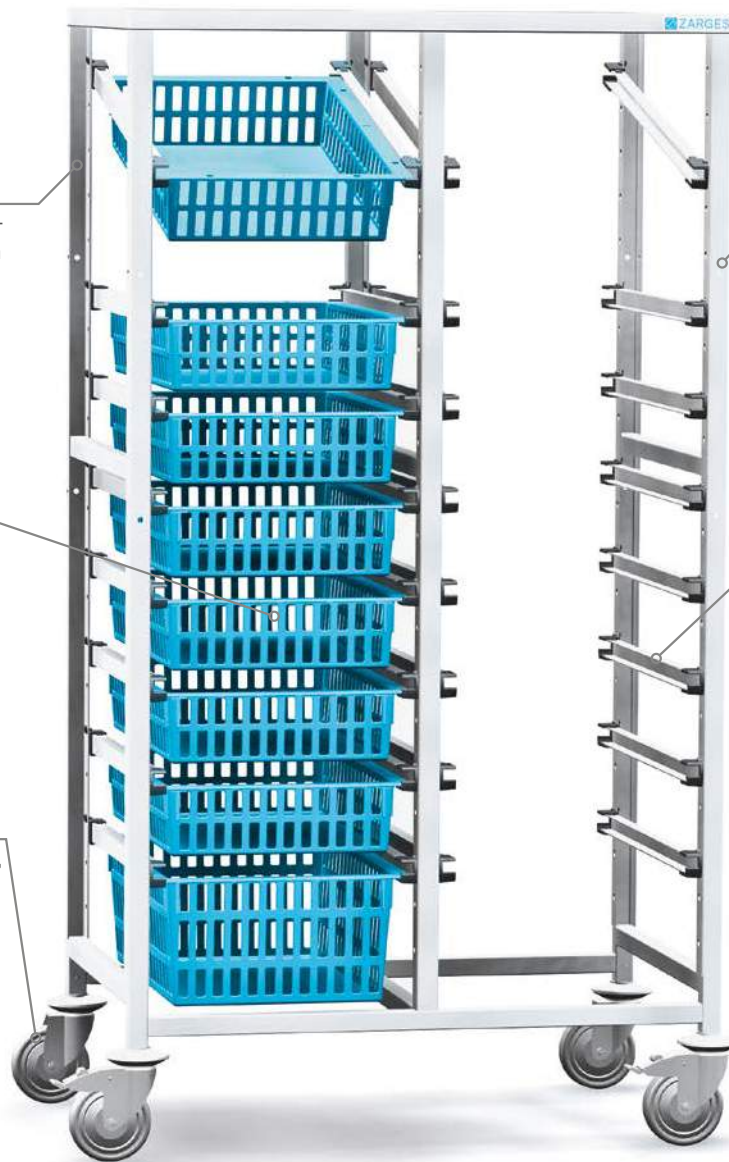

4 swivel castors, Ø 125 mm, 2 of which equipped with brakes

Material

Standard material is steel, plastic-coated

Insert rails

Designed to be equipped with insert rails which can be hooked on in various positions

Accessories: (see page 62)

Hook-on insert rails

Adapter part for telescopic rail

Fold-down worktop on the side

Ergonomic handles

Large or small, they are always the right choice: storage and retrieval trolleys.

Plenty of room on minimum floor space: standing shelving.

Standing shelving

- ▶ The basic units consist of four chrome-plated wire mesh shelf compartments and four corner posts.
- ▶ Add-on units are equipped with two corner posts and two “S” hooks per shelf compartment. The “S” hooks are used to connect the basic and add-on units.
- ▶ The circular grooves in the corner posts allow adjustment of the height of the shelf compartments in steps of approx. 25 mm.
- ▶ The wire mesh shelf compartments have a load bearing capacity of up to 400 kg each on the standing units.

Service trolley

A full range of nursing trolleys

In the healthcare sector the requirements placed on transportation trolleys vary greatly. So that you are fully equipped for every application, the ZARGES modular nursing and organisation trolleys can be tailored precisely to your individual wishes and requirements. A modular system com-

prising just a few basic components allows a wide variety of options which you can configure to your specific needs and requirements. And thanks to their unlimited mobility, all MPO models can be deployed very flexibly – as medication trolleys, dressing trolleys or mobile computer workstations.

1 Worktop options. ABS plastic and HPL plastic, with and without gallery, stainless steel. **2 Aluminium handle.** For convenient handling, easy to clean. **3 Side wall.** Also available with a coloured centre segment. **4 Bumper.** Abrasion- and disinfectant-resistant plastic padding. **5 Precision castors.** Optionally with bumper, 4 precision castors, Ø 125 mm, 2 of which with wheel brakes for maximum mobility in confined spaces. **6 Corner posts.** Made from anodised aluminium. **7 Trolley base.** Made from sturdy HPL plastic sheet.

For every requirement and application: a wide range of front options.

Doors

Double hinged doors, behind them telescopic rails, support walls or shelf compartment.

Drawers

Suitable for ZARGES ISO modules mounted on telescopic rails.

Doors & drawers

One drawer and double hinged doors, behind them telescopic rails, support walls or shelf compartment.

Clearly laid-out, efficient and manoeuvrable: RSO shelf trolleys.

A closed shelf trolley for all areas of application in hospitals and nursing facilities, where clear storage and efficient distribution are prime considerations. Nursing supplies, e.g. care products, napkins or laundry are stored dust-free and are always to hand when needed.

Its low weight and optimum manoeuvrability make the RSO shelf trolley the ideal aid for all everyday nursing tasks such as storage on the ward or patient-specific laundry supplies. The comprehensive range of accessories makes the RSO suitable for every task.

1 Corner profiles. Anodised aluminium. **2 Side walls and rear wall.** Anodised aluminium, side walls also available in RAL 5002 ultramarine blue. **3 Interior fittings.** Configure with modular drawers, modular baskets and shelf compartments. **4 Trolley base.** Anodised aluminium, without undercut, easy to clean. **5 Chassis.** 4 swivel castors with Ø 100 mm, 2 of which with wheel brakes. **6 Rolling tambour door.** Space-saving opening through plastic rolling tambour door, which can be removed without the use of tools and cleaned.

Efficient and innovative –
from storage to transport.

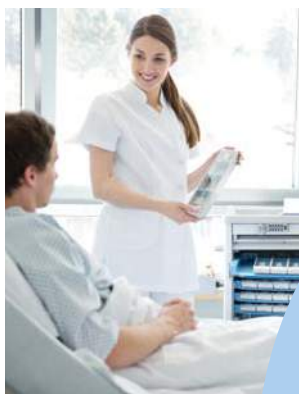

The distribution cycle for medicine.

New solutions are required for a more efficient distribution of medication in the healthcare sector. And these solutions need to be future-oriented and intelligent. Based on the ISO standard, the ZARGES system supports nursing staff in the execution of their daily tasks.

The ZARGES solutions offer the ideal products for

- ▶ clearly arranged storage.
- ▶ efficient preparation.
- ▶ safe transport.
- ▶ reliable distribution.

The right solution, whatever your requirements: individual interior fittings.

Fixed shelf compartments

For universal applications.

Insert levels for ZARGES ISO-standard modules

ABS support rails ensure that the modules slide easily.

Folding additional shelves

Safe and ergonomic working, suitable for transporting fresh or dirty laundry as well as waste in bags.

Practical support systems for the ZARGES modular equipment range

Support wall, shelf compartment, insert rails, variable- and fixed-installation telescopic rails.

Height of additional shelves adjustable by means of notched rails

Suitable for various packaging sizes.

Removable additional shelves

Shelves can be used variably and cleaned separately.

Accessories and customisation.

Coloured markings

For customisation.

Trolley-top bumper and reinforced corners

Protection of the trolley body during transport by lorry.

Lock attachment

With identical and individual locking for safe transport.

Drawbar and coupling for linking and moving trolleys in trains

For in-company transport (of up to a maximum of 5 trolleys).

Label frames in various sizes

Simple holder for removable labels.

Special castors

Stainless steel castors with directional lock, central stop and Total Stop, for a wide range of applications.

Blackboard

For simple labelling on the trolley itself, self-adhesive and rewritable.

Lead seal

To seal the container against unauthorised opening.

Top railing

For securing items on the top of the trolley.

ZARGES box trolleys – universal helpers.

For transportation within the company, deliveries to external plants and branches, laundry transport, supply or disposal – there is a ZARGES box trolley for every application.

A wide selection of models and a comprehensive range of accessories make ZARGES box trolleys all-round helpers. Special constructions are available for special applications.

Safe and secure transport – with the W 171 transport trolley.

W 171 trolley with 3-part lid

- ▶ 3-part lid folding mechanism with a flap in the front wall.
- ▶ Anodised design.
- ▶ Container cutout with profile-section surround; profile-section joints continuously welded.
- ▶ Sturdy, generously dimensioned edge and base profile sections, high-strength positive locking ensures permanent bonding to jacket and base metal.
- ▶ Smooth walls without beads.
- ▶ Longitudinal seam welded, base joint sealed all round.
- ▶ Trolley base with drainage channel and drain valve.
- ▶ Ergonomic handle on the swivel-caster side.
- ▶ Plastic-padded peripheral bumper frame.
- ▶ Chassis: 2 swivel and 2 fixed castors, corner-mounted, Ø 200 mm, 50 mm wide, easy running, rubber wheels, "non-marking," roller bearings, thread guards.

Basic equipment

Drain valve

3-part lid

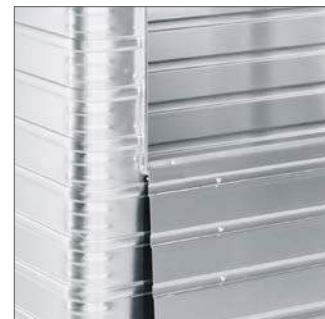

Fender frame

Belt strap

Accessories and special equipment.

Tow-bar with coupling

- ▶ Folds upwards.
- ▶ Firmly attached towing device.

Chassis/castors

- ▶ Ø 125 mm, 40 mm wide.
- ▶ Ø 160 mm, 40 mm wide.
- ▶ Ø 200 mm, 50 mm wide.
- ▶ On request, also available in stainless steel for container washdown facilities.

Centre pivot

- ▶ Ø 40 mm.
- ▶ For lift-tilt device.

Brake for swivel castors

Ergonomic handle

- ▶ Made from anodised aluminium section.

Peripheral fender frame

- ▶ Plastic-padded.

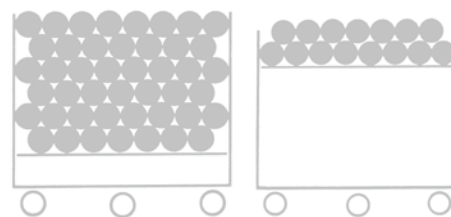

Divider panel

- ▶ To separate different materials.
- ▶ Optional: fixed or movable.

Order Numbers on request

They make your work easier: spring-loaded trolleys for the catering trade, laundries and storage and retrieval areas.

(1) Constant working height

(2) Replaceable lifting elements

W 161 spring-loaded trolley

- ▶ Sturdy, generously dimensioned edge and base profile sections, high-strength positive locking ensures permanent bonding to jacket metal.
- ▶ Anodised, edge profile reinforced with abrasion resistant plastic padding.
- ▶ Trolley base can be moved vertically, ensuring that the contents are always kept at a constant height (1).
- ▶ Depending on the type of trolley, the load capability can be varied from 30 to 195 kg in increments of 15 kg by means of replaceable lifting elements.
- ▶ The moveable base does not tilt even when loaded on only one side (2).
- ▶ Chassis: 2 swivel and 2 fixed castors, Ø125 mm, 40 mm wide, easy running, rubber wheels, "non-marking," roller bearings, thread guards.
- ▶ Castors arranged centrally for easy manoeuvring even in the most confined spaces.
- ▶ Corner-mounted chassis available on request.

Spring-loaded trolley with step

The combination of a spring-loaded trolley with steps is particularly suitable for use in storage and retrieval areas in industry.

Project-specific fabrication to meet your requirements.

Clever concepts to protect your data.

ZARGES DATA® security containers

Professional data disposal firms and companies large and small have relied on the safety of the ZARGES DATA® security container for many years – the new quality will astound you.

- ▶ Especially sturdy due to large edge and base profiles.
- ▶ Unique stability because profile-section joints are continuously welded in the cross-section.
- ▶ The profile sections have a fully integrated and permanently engineered bond which positive-locks them to the jacket and base metal.
- ▶ End and side walls reinforced with peripheral beading and corner beads (70-l container with corner beads only).
- ▶ All riveted joints are made with high-quality full rivets.
- ▶ Lid has solid surrounding lid frame with integrated wall fenders (piping buffer profile) and slotted lid plate.
- ▶ Lid with lid slot (approx. 420×24 mm), locking plate and spring-loaded flap.
- ▶ Logo holder for your unique marking.
- ▶ Container available with various locking system options.
- ▶ Optimum mobility with a wide choice of wheel options.

Select the ZARGES DATA® security container suitable for your application. There are many standard variants and combination options available. With 7 different basic models and a comprehensive range of accessories, you can choose from well over 100 possibilities.

We can also manufacture customer-specific solutions to your specifications.

Car-in-Car: components for the operating-theatre area.

ISO internal trolley (3 STE)

- ▶ Made from stainless steel 1.4301.
- ▶ Surfaces glass-bead peened.
- ▶ Accommodates components of the ZARGES ISO modular system and sterile containers.
- ▶ Maximum exploitation of space in the internal trolley via variable arrangement of the insert rails.
- ▶ Outside dimensions: L×W×H, 456×600×1,171 mm.

Order No. 46591

ISO transfer trolley

- ▶ Made from polished stainless steel 1.4301.
- ▶ Tight docking, including locking mechanism to cupboard trolley and ISO platform, ensures safe transfer of the ISO internal trolley.
- ▶ User-friendly release of the locking mechanism at the ergonomic handle.
- ▶ 4 stainless steel swivel castors, suitable for container washdown facilities, Ø125 mm, 2 of which with brakes, for very easy transport and simple handling.
- ▶ Outside dimensions: L×W×H, 575×710×962 mm.

Order No. 46592

CIC insert rail

- ▶ Made from polished stainless steel 1.4301.
- ▶ Height can be adjusted without the use of tools.
- ▶ For storage of shelf compartments and the ZARGES ISO modular system.
- ▶ Outside dimensions: L×W×H, 32×598×67 mm.

Order No. 46594

ISO shelf compartment, CIC

- ▶ Made from polished stainless steel 1.4301.
- ▶ Perforated.
- ▶ For placing on insert rails.
- ▶ Outside dimensions: L×W×H, 405×598×10 mm.

Order No. 46595

ISO platform

- ▶ Made from polished stainless steel 1.4301.
- ▶ Brackets for securing the internal trolley on the ISO platform.
- ▶ Docking device for locking on the front side, for transfer trolley.
- ▶ Outside dimensions: L×W×H, 686×683×346 mm.

Order No. 46593

ZARGES hazardous goods containers meet a wide range of requirements.

Strict safety regulations are laid down by law for the packaging and transport of hazardous goods. Hazardous goods may only be transported in packaging that meets these criteria

and is approved by the relevant authorities. ZARGES has many decades of experience with UN-approved containments made from aluminium.

CUSTOMER + ZARGES

Consultation and packaging conception (internal and external packaging)

The ZARGES product range

In most cases, the wide range of standard products will offer a variety of solutions which meet the most exacting requirements. Here, in addition to the K470, you will find an excerpt from our main product series:

K 470

W 105 N
cupboard trolley

UN 3291 reusable
transport container

Hazardous goods containers for potentially contagious material of Category 6.2.

ZARGES hazardous goods containers are approved as composite packaging for the transport of potentially contagious substances in accordance with UN numbers 2814 and 2900, Category A and B, with any transport operator.

The containers have passed stringent tests, such as e.g. a drop test from a height of 9 m. All sizes in the K 470 series can be used for the transport of UN number 3373. Dry ice or other coolants can be used for thermally controlled transport.

Cupboard trolley with UN approval for the use of UN 3291

Contaminated surgical instruments are transported between hospital and service company for disinfection and preparation. Due to the risk of infection, these objects are defined as hazardous goods of class UN 3291, clinical waste.

Bag with slide-type seal

- ▶ With easy-to-operate slide-type seal for quick and simple opening and closing.
- ▶ Mandatory for infectious substances which must be packed in accordance with transport regulations P620 or P650.
- ▶ Material: PE, thickness 100 µm.

Order No. 43831

K 470 with approval for Category 6.2

- ▶ For substances with UN numbers 2814 and 2900.
- ▶ Container has passed stringent tests, including a drop test from a height of 9 metres.

Order No. 342856

Insulating container

- ▶ Compatible with K 470 with inside dimensions L x W x H 350 x 250 x 310 mm.
- ▶ For temperature-controlled transport.
- ▶ Can also be used with dry ice.

Order No. 44595

Collection and transport – well thought-out in every detail.

Whether you need a system for collecting and transporting laundry, recyclables or waste: ZARGES offers high-quality, ergonomically designed products for every step. Hygienic, easy to clean and well planned, right down to the smallest detail.

The practical helpers as you go about your everyday work:
waste collection systems.

Stainless steel waste collection system "Kompakt"

- ▶ Polished stainless steel frame.
- ▶ All tube connections fully welded.
- ▶ Bag fitting rings each with SR 400 rubber ring.
- ▶ 4 swivel castors, Ø 75 mm, easy-running castors.
- ▶ With hinged lid and plastic floor pan.

Order No.	Designation	Dimensions, L × W × H, approx. mm
NA71	Single-compartment collection station	420 × 530 × 950

Medical Packaging

Optimum packaging solutions with ZARGES cases and accessories.

Product overview	156–157
K 424 XC	158–159
K 470 universal container	160–161
Interior fittings	162–164
Accessories	165

ZARGES has the right interior fittings for every packaging task.

Added security with electronic lock with personal PIN code

Sturdy aluminium cases offering perfect organisation for emergency medical and disaster relief services

Safe packaging for the transportation of biological samples

K 424 XC with integrated castors and telescopic handle

Flexible mobility for all K 470 models with clip-on castors that can be fitted without the use of tools

For safe transportation of instrument containers in precisely tailored foam insert

Insulation insert suitable for the use of dry ice

Ergonomic transportation with the new K 424 XC

ZARGES K 470 with approval for the transportation of highly infectious materials

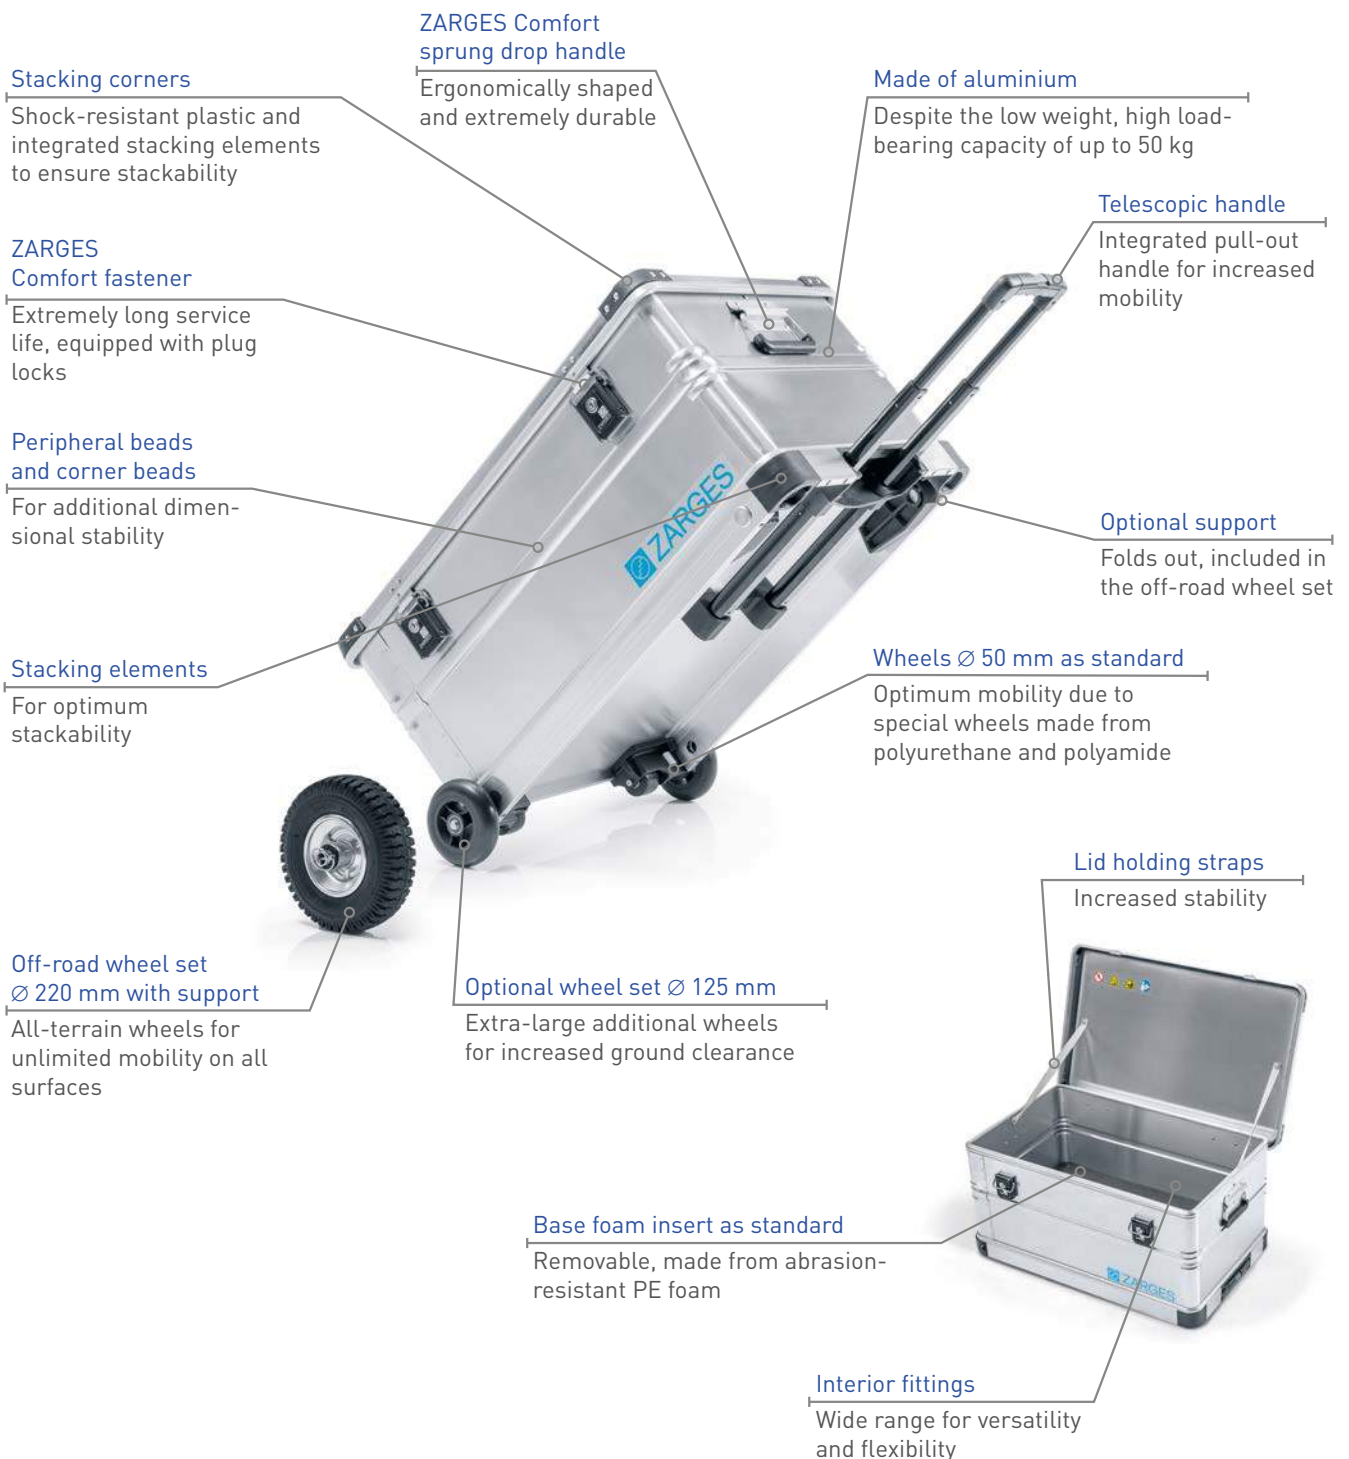

K 470: hygienic and safe transport

The new K 424 XC combines the legendary quality of ZARGES cases with new mobility.

The requirements placed on a mobile box vary as widely as those of the people who use them. So how does the ZARGES K424 XC manage to meet all these needs?

The answer is simple: reduction to the essentials. Perfect protection, the highest level of mobility, minimum weight and ergonomic design.

INNOVATION

Unlimited mobility – it's smooth running on any surface when you have the right wheels.

Individual design

Foam inserts that fit perfectly

Individual foam inserts – high-tech for your interior fittings

- ▶ We manufacture tailor-made foam inserts in a large range of materials to provide perfect protection and functionality geared specifically to the goods you are transporting.
- ▶ You supply photos, drawings, 3D-data or original parts – and our designers develop the perfect inserts for your specific application.
- ▶ You have a choice of various colours.
- ▶ Antistatic, dissipative or flame-retardant designs available.
- ▶ Another special characteristic of these first-class foam materials is that the protective effect of the finished packaging can be calculated in advance.
- ▶ On the basis of weight, surface area, drop height and sensitivity of the goods (G value), we develop for you packaging with the optimum padding thickness. The result: lowest possible raw material requirements with maximum protection.

The perfect padding: foam linings for universal protection.

Delivery without content.

Foam Lining

On request, all K470 containers can be equipped with a durable, abrasion-proof PE-foam lining: Base and walls made from Plastazote LD 45 (specific gravity 45 kg/m³, thickness 11 mm), lid with PU nubbly foam. Other materials and wall thicknesses on request.

Peripheral foamed seal in the lid

Protected against water jets

ZARGES K470 – optionally with protection class IP 65, the dust-tight case that is protected against water jets

- ▶ These cases are used wherever valuable and sensitive equipment needs to be protected against extreme environmental influences.
- ▶ The automatic pressure relief valve with Gore™ membrane ensures that the lid still opens reliably even after changes in the air pressure.
- ▶ The K470 IP 65 has been successfully tested by TÜV SÜD and certified leak-tight.

To make your everyday tasks easier: practical accessories.

For further tread designs, see www.zarges.com

Z 600 hook-on shelf ladder

- ▶ The shelf ladders have two hooks for the guide rail and additional hooks for vertical storage on the shelf (see A and B).
- ▶ Wear-resistant, anodised stiles.
- ▶ Bolted tread with padded front edge.

Please quote the distance between the floor and the top edge of the tubular rail when ordering! Can only be used with cupboard with railing front.

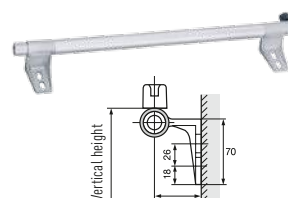

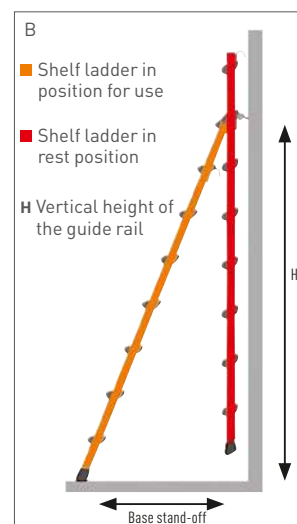

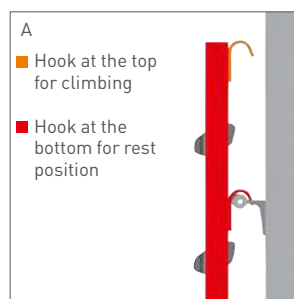

Order No.	From/to maximum vertical hook-on height, m	No. of treads
41402	1.30–1.50	6
41403	1.51–1.73	7
41404	1.74–1.94	8
41405	1.95–2.17	9
41406	2.18–2.39	10
41407	2.40–2.60	11
41408	2.61–2.83	12

Base stand-off = vertical height of the guide rail × 0.404

Accessories

Order No.	Tubular rail
40370	Aluminium alloy tube, Ø 30 mm, 3,000 mm long, anodised
41457	Aluminium alloy intermediate bracket
41458	Aluminium alloy bracket with stop on the right
41459	Aluminium alloy bracket with stop on the left

Rail systems: one intermediate bracket to be provided for each approx. 1.00 m length of tubing.

For easy travel backwards and forwards along your shelving: with guide rails and self-locking sprung castors.

For further tread designs, see www.zarges.com

Z 600 shelf ladder, mobile

- ▶ Both the top of the ladder and the self-locking sprung castors at the bottom lock the shelf ladder when weight is applied.
- ▶ When not in use, the ladder can be stowed against the shelving to save space.
- ▶ Wear-resistant, anodised stiles.
- ▶ Bolted tread with padded front edge.

Please quote the distance between the floor and the top edge of the tubular rail when ordering! Can only be used with cupboard with railing front.

Order No.	From/to maximum vertical hook-on height, m	Number of treads
41412	1.68–1.89	6
41413	1.90–2.13	7
41414	2.14–2.34	8
41415	2.35–2.56	9
41416	2.57–2.78	10
41417	2.79–3.00	11
41418	3.01–3.22	12

Base stand-off = vertical height of the guide rail × 0.404

Mobile shelf ladder in rest position

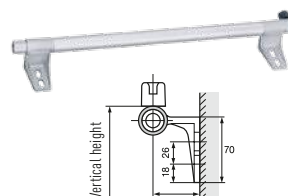

Mobile shelf ladder in position for use

Accessories

Order No.	Tubular rail
40370	Aluminium alloy tube, Ø 30 mm, 3,000 mm long, anodised
41457	Aluminium alloy intermediate bracket
41458	Aluminium alloy bracket with stop on the right
41459	Aluminium alloy bracket with stop on the left

Rail systems: one intermediate bracket to be provided for each approx. 1.00 m length of tubing.

Protection for your shins: high degree of comfort while working through padded treads.

Applies to both ladders

Z 600 bolted stepladder with treads and padded front edges, mobile

- ▶ Shin-protecting padding on front tread edges.
- ▶ Wear-resistant, anodised stiles.
- ▶ Treads with plastic caps on the front edges.
- ▶ Solid safety platform made from die-cast aluminium (250 × 250 mm).
- ▶ Practical aluminium storage tray for small items and tools.
- ▶ Bolted connection between treads and stiles.
- ▶ Treads and stiles made from extruded aluminium sections.
- ▶ High-strength Perlon belts prevent splay, from 4 treads.
- ▶ Equipped with 4 sprung swivel castors, Ø 80 mm, for added mobility.
- ▶ Added stability thanks to rigid locking bar on both sides.

The quick and flexible way to bridge small differences in height.

Z 600 mobile step stool

- ▶ Ribbed, non-slip standing surface.
- ▶ Mobile version with self-locking sprung castors.
- ▶ Extremely stable due to patented automatic locking mechanism and non-slip rubber lip.
- ▶ Platform diameter of 30 cm for safe standing.

Order No.	Platform height, m	Working height, approx. m	Diameter, top, m	Diameter, centre, m	Diameter, bottom, m	Weight, kg
40918	0.43	2.45	0.30	0.37	0.45	3.5

Z 600 safety steps, folding, with non-slip rubber surface

- ▶ Large standing area: 230×360 mm.
- ▶ Large steps for safe and comfortable standing, with rubber surface.
- ▶ Collapsible for extremely compact dimensions.
- ▶ Safety bar with practical storage tray, optional on the 3-step variant, attached as standard on the 4- or 5-step variant.
- ▶ Stile ends with plastic edge finish.
- ▶ Stiles made from extruded aluminium sections for maximum stability.

Order No.	Platform height, m	Working height, approx. m	Lower, outside width, m	Safety bar	Stile height, mm	Number of treads incl. platform	Weight, kg

Accessories

Order No.	Designation
41929	Castor set (possible from 3 treads)

The economical version for safety when working and rapid erection and dismantling.

Z 500 COMPACT folding scaffold unit

- ▶ Scaffolding width: 0.68 m; scaffolding length: 1.80 m.
- ▶ Scaffold unit in working height 2.90 m optionally without (Order No. 53760) or with (Order No. 53761) access hatch in the platform.
- ▶ Basic module for folding for rapid erection and dismantling.
- ▶ Minimum space requirement during transportation and storage (dimensions when folded only 1.75×0.95×0.20 m).
- ▶ Scaffolding category 3 (can be loaded up to 200 kg/m²) in accordance with DIN EN 1004, i. e. here 202 kg.
- ▶ Standard castors: 125 mm with pin (non height-adjustable) with rubber coating.

Platform size	approx. m	0.60 × 1.80		
Working height		2.90	2.90	3.70
Parts list	Order No.	53760 (w/o trapdoor)	53761 (w. trapdoor)	53762
Folding frame unit	42734	1	1	1
Guard-rail frame, 1.00 m	42740	–	–	2
Trapdoor platform	42725	–	1	1
Platform without trapdoor	42720	1	–	–
Horizontal brace	42742	–	–	3
Swivel castor, Ø 125 mm, with pin	42743	4	4	4
Ballast weights		Number of ballast weights per swivel castor, for mounting on the stile		
Indoor use	42912	–	–	1
Outdoor use		–	–	1

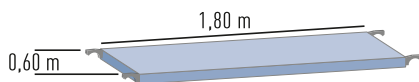

For 53760: Platform has no trapdoor and therefore cannot be extended.

For 53761: Platform is equipped with an access hatch and can therefore be extended.

For 53762: Ballasting is not required if 4 stabilisers (Order No. 42756) are used.

Observe ballasting regulations in the assembly and usage instructions!

ZARGES Service.

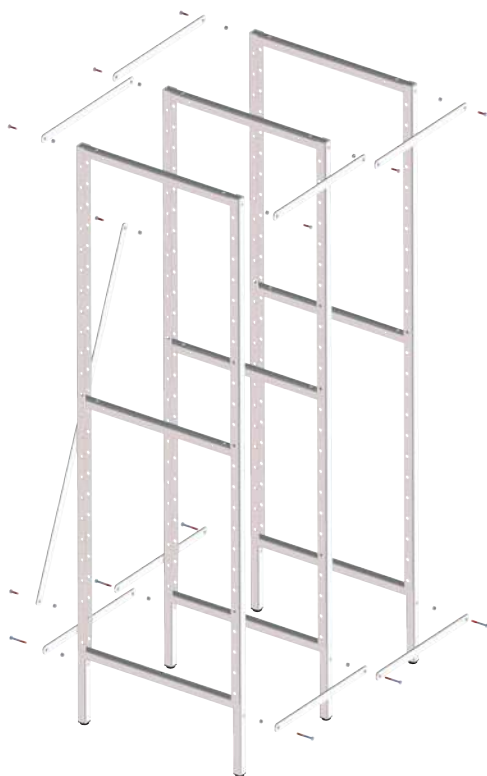

Technical recommendations

Our general cleaning recommendations for your ZARGES modular system and aluminium transport trolley are available on request.

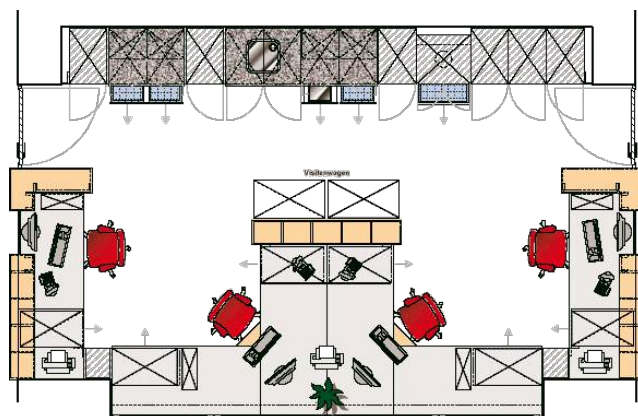

Spare parts

A quick and dependable supply of original ZARGES spare parts ensures that your products remain in perfect condition even after many years of use. All original ZARGES spare parts are available in accordance with the legal provisions.

Assembly instructions

Detailed assembly instructions are available on request for self-assembly of all kits and support systems.

Spatial planning

On the basis of logistics workflows and work ergonomics and in accordance with all hygiene standards, we plan facilities which are tailored to the specific requirements of your company in both materials and design. If desired, we can also coordinate the technical processes (see page 10).

Additional information Medical.

ISO-standard modules

The ZARGES modular system is based on ISO standard 3394, which specifies a basic size of 600 mm × 400 mm. This standard defines the dimensions (L × W 600 × 400 mm) for rigid, rectangular-shaped transport packaging.

ABS modules

The ISO-standard modules used by ZARGES are manufactured from ABS (Acrylonitrile Butadiene Styrene) plastic. ABS is a thermoplastic. Due to its organic constituents, ABS is resistant

to anorganic media, lactic acids, lyes and aqueous saline solutions. Prolonged contact with organic solvents such as alcohol, acetone and benzene is not recommended. During the cleaning of ABS modules, a max. temperature of 100°C is possible for brief periods. The maximum constant temperature for cleaning is 85°C.

PC modules

ZARGES PC modules are made from PC (polycarbonate) plastic. PC is a polyester. Polycarbonate is a thermoplastic which is naturally transparent but can be dyed. It is dimensionally stable and

has high impact resistance. Polycarbonate is bio-compatible. Polycarbonate is resistant to diluted acids, oils and ethanol, but is not resistant to alkalis, concentrated acids, aromatic hydrocarbons or methanol. Only neutral cleaning agents should be used for cleaning. The use of abrasive scouring agents will scratch the surfaces. During the cleaning of PC modules, a max. temperature of 135°C is possible for brief periods. The maximum constant temperature for cleaning is 125°C.

Soft closing

The drawers of ZARGES MPO trolleys are equipped with soft-closing telescopic rails. The soft-closing system reduces the speed at which the drawer is closed, cushioning the movement.

Notched rail

Used for the variable installation of telescopic rails. The metal rail, which has notches at intervals of 25 mm, is screwed tightly to the inner wall of the cupboard. Variable installation without

the use of tools facilitates height adjustment of the telescopic drawers.

Approval for the transportation of hazardous goods

Special hazardous goods packaging (also called 'hazardous goods containments') is used to transport hazardous liquids or solids safely by land, air or

sea. Hazardous goods packaging requires a type approval which certifies that the containers are tested for leak-tightness and compliance with further specific requirements. In Germany, new approvals are granted exclusively by the Federal Institute for Materials Research and Testing (Bundesanstalt für Materialforschung und -prüfung - BAM). ZARGES is a BAM-certified testing centre and as such, is authorised to test and document its own hazardous goods containments and to apply for approvals for them. ZARGES draws on many decades of know-how in the design and manufacture of hazardous goods packaging.

Anodisation

When it comes into contact with oxygen from the air, the surface of aluminium oxidises. This dense layer of oxide immediately reforms when damaged and protects the metal underneath

against corrosion. Under conditions of particular stress, surface protection can be improved even further by means of anodisation. This material property contributes significantly to the long service life of ZARGES products. Anodisation protects sensitive goods against aluminium abrasion and makes them more suitable for use in washdown facilities, thus preventing staining, e.g. of laundry.

Riveted joints

All riveted joints are produced with full rivets. Where there are exceptionally high loads, high-strength rivets are used to ensure optimum durability at all times.

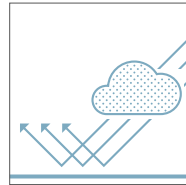

Safety stop system

The safety stop system prevents drawers with telescopic rails on MPOs tilting. The continuous locking bar prevents several drawers being pulled out at the same time.

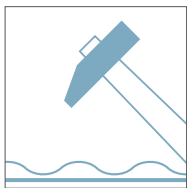

The advantages of aluminium – an economical, safe and environmentally friendly material.

**Aluminium is lightweight, yet extremely stable:**

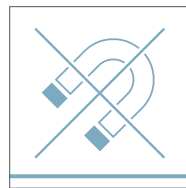

The density of aluminium is only approx. 2.6 to 2.8 g per cm³. That is approx. 1/3 the density of steel. In spite of its low weight, aluminium is extremely strong.

**Aluminium is vapour-impermeable:**

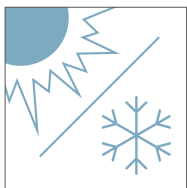

Even when stored over very long periods of time, moisture will not diffuse through the material. An aluminium container can be welded to make it water-vapour-proof.

**Aluminium is impact-resistant and extremely strong:**

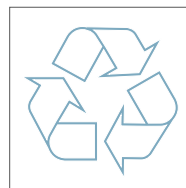

Its surface dents on impact, but the force of the blow is absorbed by the deformation.

**Aluminium is magnetically neutral:**

Aluminium is not ferromagnetic. This material characteristic can be of great significance for certain applications.

**Aluminium is insensitive even to extreme fluctuations in temperature:**

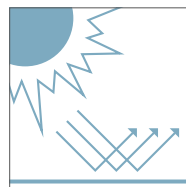

The material characteristics remain constant within a temperature range of -80 to +150 °C.

**Aluminium is fully recyclable:**

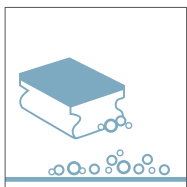

Used aluminium can be melted down and re-used – an important contribution towards the reduction of waste and the protection of the environment.

**Aluminium is corrosion-resistant and protects itself:**

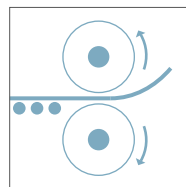

When it comes into contact with oxygen, the surface of aluminium oxidises, and this layer of oxide immediately reforms when damaged.

**Aluminium is resistant to UV rays:**

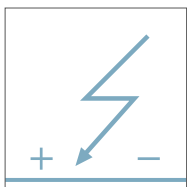

Long periods of storage and exposure to UV rays have no effect on this material.

**Aluminium is hygienic:**

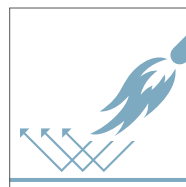

The smooth surface of aluminium is easy to clean and odourless. Aluminium containers are ideal for use in areas with high hygiene requirements.

**Aluminium can be processed in a wide variety of ways:**

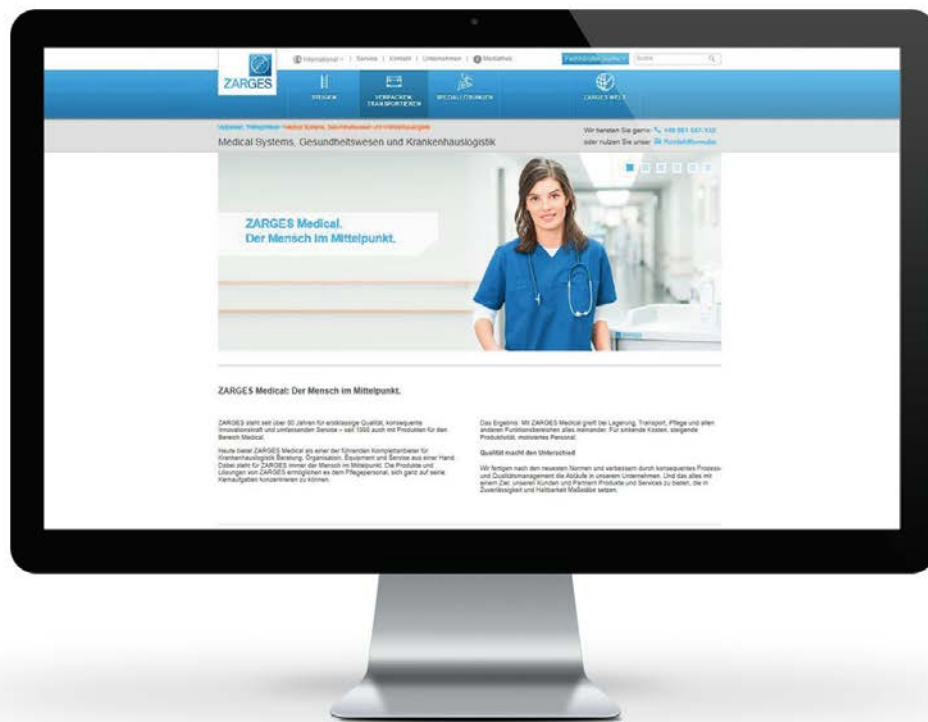

All standard processing methods – welding, moulding etc. – can be applied to aluminium, and in many cases their application is much easier than with other metals.

**Aluminium is antistatic:**

Aluminium is a good conductor of electricity and heat, an advantage, e. g. for housings for built-in electronic components.

**Aluminium is incombustible:**

No sparks fly when you strike aluminium materials. Aluminium is non-flammable, and not even aluminium shavings burn.

www.zarges-medical.com

General Terms and Conditions of ZARGES GmbH.

Version: September 2014

1. Scope

- 1.1 Our sales terms only apply to companies within the context of paragraph 1 of §310 of the BGB.
- 1.2 Our sales terms apply exclusively. Conflicting conditions or customer conditions that deviate from our sales terms shall not be recognised if we do not consent to them explicitly in writing. Our sales terms shall also apply without reservation in cases where we complete the delivery to the customer, despite being aware that the customer has contradictory or deviating conditions.

2. Formation of the contract

- 2.1 Our product offering on the Internet, in brochures and other printed media shall remain subject to change. We reserve the rights to all illustrations, drawings, calculations and other documents, including designs provided within the context of an offer. This shall also apply to written documents that are indicated as being confidential. Upon request or in the event that the contract is not awarded to the customer, these documents must be returned immediately. The customer may only pass these on to third parties with our explicit written permission.
- 2.2 Orders are offers from our customers. They may be accepted by us in writing with an order confirmation within two weeks of receipt.
- 2.3 No oral side agreements shall be made.

3. Content of contracts that govern the production of parts according to plans or drawings from the customer

Special tools for completing the contracts shall be invoiced to our customers at cost price. These tools shall remain our property. Upon completion of the contract, the tools will be stored by us for one year. On expiry of this period, the tools will be destroyed.

4. Prices

Our prices are net prices in euros ex works (Weilheim in Upper Bavaria). Prices do not include packaging. Packaging will be invoiced separately. VAT shall be indicated on the invoice separately according to the legal amount on the day the invoice is submitted.

5. Delayed payment

Unless otherwise stipulated in the order confirmation, the purchase price will fall due without deductions within 30 days from date of invoice.

The customer shall only be entitled to offset payment in cases where the counterclaims have been determined to be legally valid, are undisputed or if they are acknowledged by us.

6. Delivery time

- 6.1 The beginning of an agreed to or indicated delivery time requires clarification of all technical questions in advance.
- 6.2 Adherence to our obligation to deliver also requires timely and correct fulfilment of the customer's own obligations. The right of exemption on the grounds of failure to fulfil contractual conditions remains reserved.
- 6.3 If the customer delays acceptance of the delivery or if other co-operative obligations are violated, then we shall be entitled to demand remuneration for additional costs and possible damage incurred. We reserve the right to subsequent claims.
- 6.4 In the case if item 6.3, the risk of accidental destruction or of accidental damage caused to the purchased goods shall be transferred to the customer when acceptance of the delivery or payment (arrears) is delayed.
- 6.5 We shall be liable in accordance with the legal provisions in as far as the sales contract in question represents a forward transaction within the scope of point 4 of paragraph 2 of §286 of the BGB or §376 of the HGB. We shall also be liable in accordance with the legal provisions in cases where the customer is entitled to claim that the interest in fulfilment is void as a result of a delivery delay caused by us.
- 6.6 Furthermore, we shall also be liable in accordance with the legal provisions in the event that a delayed delivery results from a wilful or grossly negligent breach of contract on our part. Responsibility on behalf of our representatives or vicarious agents is to be attributed to us. In as far as the delivery delay involves grossly negligent violation of the contract on our behalf, our liability to effect compensation shall be limited to the typically occurring, foreseeable damage.
- 6.7 We shall also be liable according to legal provisions if the delivery delay for which we are responsible involves a culpable violation of an important contractual obligation. However, our liability to effect compensation in such cases shall be limited to the typically occurring, foreseeable damage.
- 6.8 Otherwise, in cases of delayed delivery, we shall be liable to pay compensation for each complete week of delay within the scope of a flat-rate delay penalty amounting to 0.5% of the delivery value per week, but with maximum liability of 5% of the delivery value.
- 6.9 Other statutory claims of the customer remain unaffected.

7. Transfer of risk

Unless otherwise stipulated in the order confirmation, the transfer of risk with regard to the delivery shall be agreed to as "ex works."

8. Liability for defects

- 8.1 The customer's rights regarding defects are subject to the customer successfully fulfilling his obligation to examine the goods and report defects in accordance with §377 of the HGB.
 - 8.2 Provided a defect is present in the purchased item, the customer is entitled to claim supplementary performance. Provided a claim to supplementary performance is submitted, we may choose to correct the defects or deliver a new, defect-free item. In the case of supplementary performance, we shall be obligated to cover all costs involved in correcting the defects, provided that these do not increase as the result of the purchased item being at a location other than the place of fulfilment.
 - 8.3 If supplementary performance is unsuccessful, the customer may choose to withdraw or demand a price reduction.
 - 8.4 We shall be liable in accordance with the legal provisions in cases where the customer enforces claims for damages based on wilful or gross negligence, including wilful or gross negligence on the part of our representatives or vicarious agents. In as far as we are not charged with wilful breach of contract, liability for claims for damages shall be limited to the foreseeable, typically occurring damage.
 - 8.5 We shall be liable in accordance with the legal provisions in cases where we culpably violate an important contractual obligation; however, in this case, claims for damages shall be limited to the foreseeable, typically occurring damage.
 - 8.6 Legal liability in the case of culpable injury to life, limb, or health shall remain unaffected; this shall also apply in cases where liability is strictly prescribed according to the Product Liability Act.
 - 8.7 Unless otherwise specified above, our liability shall be excluded.
 - 8.8 The limitation period for claims involving defects shall be set at 12 months beginning with the transfer of risk. This shall not apply to cases involving the sale of an item that would normally be used for a given structure and that in turn resulted in the damage in question.
 - 8.9 The limitation period in the case of a delivery recourse according to §§478 and 479 of the BGB shall remain unaffected. This period is 5 years, beginning with delivery of the defective item.
- 9. Joint liability**
- 9.1 Further liability for damage claims other than indicated in item 8 is excluded, regardless of the legal nature of the claim being asserted. This shall apply especially to damage compensation claims resulting from default upon formation of the contract, due to other violations of obligation, or due to criminal claims to compensation for damage to property according to §823 of the BGB.
 - 9.2 The limitation according to item 9.1 also applies in cases where the customer demands reimbursement for wasted expenditures instead of claiming compensation for damage in place of performance.
 - 9.3 Insofar as our liability for compensation of damages is excluded or limited, this shall also apply with regard to liability for personal damage compensation vis-à-vis our employees, workers, colleagues, representatives and vicarious agents.
- 10. Retention of title of ownership**
- 10.1 We shall retain the title of ownership to goods delivered by us until all payment obligations resulting from the delivery contract have been fulfilled.
 - 10.2 In the case that the customer violates the provisions of the contract, especially in the case that payments are in arrears, we shall be entitled to reclaim the purchased item. Our reclaiming the purchased item represents a withdrawal from the contract. We shall be entitled to reclaim and resell the purchased item. Revenues from the resale shall be offset against the customer's accounts payable, less appropriate costs of the resale.
 - 10.3 The customer is under obligation to handle the purchased item with due care. In particular, the customer is under obligation to insure the purchased item against damage from fire and water as well as theft up to the amount of its initial value. If maintenance and inspection work is required, the customer shall complete this in a timely fashion at own cost.
 - 10.4 In the case of seizure or other intervention on behalf of third parties, the customer must inform us immediately in writing so that we may dispute this according to §771 of the ZPO. If the third party is not in a position to provide remuneration for the legal and extra-legal costs connected with this dispute according to §771 of the ZPO, the customer shall be held liable for the resulting loss incurred by us.
 - 10.5 The customer is under obligation to store and label the purchased item separately for as long as the retention of title remains. However, the customer shall be entitled to sell the purchased item via regular business proceedings. In spite of this, the customer shall herewith relinquish all claims against the purchaser or third parties resulting from a resale in the amount of the final invoiced sum, including sales tax on our payments receivable, and in particular, regardless of whether the purchased item has been resold without or after processing.

The customer shall remain entitled to collect our claims, even after relinquishment. The ordering party must account for incoming amounts that are offset against relinquished claims separately. Our authority to collect claims ourselves shall remain unaffected by this. However, we undertake not to collect these claims, provided the customer fulfils the obligation to pay us with the revenues collected and is not in arrears, and especially if no application for the opening of composition or insolvency proceedings has been filed and payment has not been suspended. If this is the case, however, the customer must at our request inform us of relinquished claims and debtors, provide us with all information required for collection, all associated documents and inform debtors regarding the relinquishment of the claims to us.

- 10.6 The customer shall also be entitled to process or convert the purchased item within the scope of regular business proceedings. However, this will always be carried out on our behalf. Where the purchased item is processed using objects that do not originate from us, we shall acquire joint ownership of the new item in the ratio of the value of the purchased item – our final invoiced sum plus sales tax shall be authoritative in this case – against that of the processed objects at the time of processing. Furthermore, the item resulting from the processing shall be subject to the same retention of title as the delivered purchased item.
 - 10.7 If the purchased item is inextricably integrated with objects that do not originate with us, we shall acquire joint ownership of the new item in the ratio of the value of the purchased item – our final invoiced sum plus sales tax shall be authoritative here – against that of the other integrated objects at the time of integration. Where integration takes place in such a manner that the customer's item may be considered to be the main item, it is agreed that the customer will transfer proportionate joint ownership to us. The customer shall hold the sole title or joint title thus arising on our behalf.
 - 10.8 The customer shall also relinquish to us claims against third parties that result from integration of the purchase item with real estate as a security on our own claims against the customer.
 - 10.9 We are under obligation, on request by the customer, to release our securities insofar as the value of our securities exceeds the secured claim by more than 10%. The selection of securities to be released shall be determined by us.
- 11. Claims**
- We are entitled to assign our claims against the customer to third parties.
- 12. Court of jurisdiction**
- The court of jurisdiction shall be the company's location in 82362 Weilheim, Germany. Nevertheless, we reserve the right to bring suit against the customer at the customer's court of jurisdiction.
- 13. Place of fulfilment**
- Unless otherwise stipulated by the order confirmation, the place of fulfilment is the company's location in 82362 Weilheim, Germany.
- 14. Applicable law**
- The laws of the Federal Republic of Germany shall apply; the terms of the UN Convention on Contracts for the International Sale of Goods shall not apply.
